TRANSCRIPT OF EVIDENTIARY HEARING  
AFTERNOON SESSION  
BEFORE THE HONORABLE STEVEN J. MCAULIFFE

APPEARANCES:

For the Plaintiffs:

William L. Chapman, Esq.  
Orr & Reno, P.A.

W. Scott O'Connell, Esq.  
Gordon J. MacDonald, Esq.  
Emily Pudan Feyrer, Esq.  
Anthony Galderi, Esq.  
Nixon Peabody, LLP

For the Defendant:

Nancy J. Smith, Esq.  
Jeanne P. Herrick, Esq.  
Laura Lombardi, Esq.  
Office of the Attorney General  
Civil Bureau

Court Reporter:

Susan M. Bateman, LCR, RPR, CRR

2 THE COURT: Mr. MacDonald, whenever you're  
3 ready.

4 CONTINUED DIRECT EXAMINATION OF KATHLEEN DUNN  
5 BY MR. MACDONALD:

6 Q. Good afternoon, Ms. Dunn. Before we broke we  
7 were talking about a series of rate reductions which  
8 were presented by Commissioner Toumpas to the joint  
9 fiscal committee on February 5, 2010, and we've  
10 covered -- before the break we covered two of them,  
11 one of them relating to outpatient radiology and the  
12 second to what's called revenue code 510. I would now  
13 like to turn to the issue of outpatient cost  
14 settlement.

15 As I understand the way it works, outpatient  
16 services are paid on a cost basis, is that correct,  
17 for the most part, with some exceptions?

18 A. Correct.

19 Q. And the actual costs are subject to an audit  
20 or a review by a fiscal intermediary?

21 A. That's correct.

22 Q. Is that correct?

23 A. That is correct.

24 Q. And after the intermediary's work is done,  
25 then a final cost settlement is made; is that correct?

1           A. Correct. The state compares the amount of  
2 reimbursement that the hospital has already received  
3 through interim payments as compared to what the  
4 fiscal intermediary determined, and the delta between  
5 the two is the cost settlement payment.

6           Q. Okay. And if a hospital has been underpaid,  
7 after the settlement process the state will pay the  
8 difference --

9           A. Correct.

10          Q. -- of the underpayment; is that correct?

11          A. Correct, sir.

12          Q. And as I understand it, if the state -- if  
13 the hospital has been overpaid, the hospital needs to  
14 pay back the state the amount of the overpayment; is  
15 that correct?

16          A. That's correct.

17          Q. Okay. So the issue that the commissioner  
18 presented to joint fiscal on February 5th dealt with  
19 the former situation. In other words, where the  
20 hospitals were owed money after the cost settlement  
21 process; is that right?

22          A. That's correct.

23          Q. Okay. And we took a look before the break at  
24 your March 1, 2010 letter to Mr. Ahnen, and it's  
25 helpful because you describe in there what public

1 process and state plan amendments are required for the  
2 various rate reductions that were presented by the  
3 commissioner on February 5th.

4 And I would like to go to the second page of  
5 your letter and take a look at the chart, and the  
6 second line up is the issue we're dealing with and it  
7 says: Delay Medicaid outpatient cost settlement  
8 payments. And then you say that a public notice and  
9 state plan amendment are planned.

10 Now, did the -- I think it's accurate to say  
11 that a state plan amendment with respect to outpatient  
12 cost settlements was never fought; isn't that correct?

13 A. I don't believe that's correct.

14 Q. Okay. You have the outpatient pages in front  
15 of you. Why don't you go through and tell me which  
16 state plan amendment authorized the delay of  
17 outpatient cost settlements and was filed in -- let me  
18 put it this way. Do you agree a state plan amendment  
19 was necessary?

20 A. At the time this was a delay there was a  
21 possibility that we would still be able to make  
22 payments. And in fact in state fiscal year, later in  
23 the year, we were able to make payments -- the cost  
24 settlement payments for those hospitals whose cost  
25 settlement process had been completed.

1           Q. I understand. My question is: If the cost  
2 settlements are going to be delayed, that required a  
3 state plan amendment, didn't it?

4           A. Not a delay. It would have to be paid within  
5 the state -- the Medicaid state rate year. If we were  
6 not going to pay those cost settlements, then a state  
7 plan amendment would be required.

8           At the time of this March 1st letter I did  
9 not know that we were going to have funds later in  
10 2010 to actually make the 2010 payments.

11          Q. But you told CMS the state plan amendment was  
12 required, didn't you?

13          A. We told CMS at the time that we were planning  
14 on putting a state plan amendment forward and if in  
15 the course of business we find out that it's not  
16 needed, then we don't pursue it.

17          Q. Does the state -- has the state continued its  
18 policy of delaying outpatient cost settlements?

19          A. Yes, it has, sir.

20          Q. And it's extended into this biennium, in  
21 other words, fiscal 12 and 13; isn't that right?

22          A. That is correct.

23          Q. Okay. And no state plan amendment was filed;  
24 isn't that right?

25          A. I need to actually look at this, and it might

1 be more efficient to ask one of my colleagues who is  
2 more familiar with the state plan. But I thought that  
3 if we were not going to pay those payments we would  
4 have included it in a state plan amendment, sir.

5 Q. I'm sorry. I did not hear that answer.

6 THE COURT: She doesn't know, but someone  
7 else knows.

8 A. I'm sorry. I'm trying to rifle through this  
9 very quickly and be efficient. I would expect that if  
10 we were not going to make those payments that we would  
11 submit a state plan amendment, sir.

12 Q. Okay. And a state plan amendment hadn't been  
13 filed with -- strike that. In recommending the -- or  
14 in notifying the joint fiscal committee that the  
15 department was going to be delaying outpatient cost  
16 settlements the department didn't undertake any  
17 analysis with respect to its effect on beneficiaries  
18 or providers or cost of care or access to care; isn't  
19 that right?

20 A. I believe we did.

21 Q. The action was taken in response to a need to  
22 cut the budget; isn't that right?

23 A. Yes, sir.

24 Q. Okay. Now, let's go on to catastrophic  
25 payments. And again, these cuts, like delaying

1 outpatient cost settlements, were driven by the need  
2 for the department to cut its budget; isn't that  
3 right?

4 A. Yes, sir.

5 Q. And was a state plan amendment required to  
6 delay Medicaid catastrophic payments?

7 A. For a delay of the catastrophic payments --

8 Q. I mean to suspend. To no longer pay  
9 catastrophic payments. I'm sorry.

10 A. I believe it was.

11 Q. And was one cut?

12 A. I believe it was.

13 Q. Okay. And was there public notice?

14 A. As part of the state plan process? Yes, sir.  
15 If we filed a state plan amendment, we automatically  
16 would do the public notice.

17 Q. I just show you Exhibit 36. Do you recognize  
18 Exhibit 36?

19 A. Yes, I do.

20 Q. Paragraph 2, I believe, addresses  
21 catastrophic payments?

22 A. Yes, it does, sir.

23 Q. And the public notice was published on  
24 February 26, 2010, and it asks for comments by March  
25 15, 2010; is that right?

1           A. I'm going to say yes on the March 15th  
2 because I'm not going to read this fast enough. So,  
3 yes, comments were requested.

4           Q. Okay. Let's move to the topic of UPL  
5 payments which has been discussed quite a bit during  
6 this case, and can we agree that UPL payments are  
7 authorized under the Medicaid Act and they're intended  
8 to fill the gap between the rate that providers are  
9 paid and a ceiling set under the Medicare Act? Is  
10 that a fair representation?

11          A. Yes, sir.

12          Q. Okay. And in 2010 the state paid hospital  
13 providers upper limit payments on both inpatient and  
14 outpatient services; isn't that right?

15          A. Yes.

16          Q. And as you know, the plaintiffs in this case  
17 have said that the -- let me ask you this. That  
18 payment occurred in fiscal -- occurred in calendar  
19 2010, fiscal 2011; is that right?

20          A. Correct.

21          Q. And in fiscal 2012, calendar 2011, there was  
22 no such upper payment limit payment; is that correct?

23          A. That's correct.

24          Q. And my understanding of the state's position  
25 in the case is that the -- and let's just use fiscal

1 year just to be clear. That the UPL in fiscal 11 --  
2 that payment was a one-time payment; is that right?

3 A. That is correct.

4 Q. Okay. And I will assume, because the state  
5 takes that position, that it did none of the analysis  
6 required under the Medicaid Act in terms of analyzing  
7 whether withdrawing UPL payments were consistent with  
8 its obligations under the Medicaid Act; is that  
9 correct?

10 A. That's correct. It was not required.

11 Q. And because it was a one-time payment the  
12 state didn't need to undertake anything with respect  
13 to Section 13(A); is that correct?

14 A. No. That's not correct.

15 Q. How is that incorrect?

16 A. Because, sir, the reason the state for the  
17 very first time in state fiscal year 11 did that UPL  
18 payment was to take advantage of an enhanced match  
19 that was available under the American Recovery and  
20 Reinvestment Act. In fact, it was a recommendation  
21 that came from the consultant, Health Management  
22 Associates, that the hospital association had engaged.

23 When we did the state plan amendment to  
24 include it as part of uncompensated care payments, we  
25 made a point of leaving it in the state plan just in

1 case. So at that point there were rumors that ARRA  
2 was going to be extended. And if it was going to be  
3 extended, then we would take advantage of it the  
4 following year. It turned out ARRA wasn't extended  
5 and as a result, in making the change for this state  
6 fiscal year we have in fact filed a state plan  
7 amendment following appropriate procedure.

8 Q. Okay. Because when the UPL payments were  
9 made in fiscal 2011 --

10 A. Yes, sir.

11 Q. -- a state plan amendment was required,  
12 correct?

13 A. That's correct.

14 Q. Because the methodology was changing?

15 A. The entire DSH and uncompensated care  
16 methodology changed.

17 Q. And that's when you filed a state plan. And  
18 let's take a look at 4 -- in Exhibit 2, 4.19 B, page  
19 1, the reimbursement page, and let's look at  
20 transmittal number 10-014.

21 So again, transmittal number 10-014, this was  
22 submitted in calendar 2010 to facilitate the UPL  
23 payment in fiscal 2011; is that right?

24 A. That's correct, sir.

25 Q. And it has an effective date of November 19,

1 2010?

2 A. Yes, it does, sir.

3 Q. And the redline -- this is a redline version,  
4 and it shows the change that's made on this page as  
5 compared to the previously affected page; is that  
6 correct?

7 A. Yes, it is, sir.

8 Q. Okay. So let's look at the third sentence --  
9 or actually, let's start at the beginning: For  
10 outpatient services provided in calendar year 2010 an  
11 annual Medicaid payment adjustment shall be made.

12 Then the third sentence: This annual  
13 calendar year adjustment payment will be made in the  
14 final calendar quarter of each year until such time as  
15 it may be amended under the state plan.

16 So this was not a one-time payment. The  
17 state plan provided for annual UPL payments, didn't  
18 it?

19 A. No. I disagree, sir. It says: Until such  
20 time as it may be amended under the state plan.

21 It was always clear to the department and the  
22 plaintiffs what we were doing, why we did it. If we  
23 had not put this language in, sir, if ARRA had passed,  
24 it would have delayed our ability to make UPL payments  
25 in the current fiscal year.

1 Q. Well, in order to -- and obviously you're  
2 able to talk about -- well, strike that.

3 In order to accommodate the state's lack of  
4 payment of the UPL in calendar 2011, fiscal 2012, the  
5 language before you had to be changed, didn't it?

6 A. It did because of the methodology changing.

7 Q. And, in fact, I'll give you Defendant's 195.

8 MR. MACDONALD: It's ID, but we'll stipulate  
9 to its admission.

10 THE COURT: 195, any objection?

11 MS. SMITH: No. I agree it can be full.

12 THE COURT: ID may be stricken on Defendant's  
13 195.

14 (Defendant's Exhibit 195 Admitted)

15 Q. Now, do you recognize this document?

16 A. Yes, I do.

17 Q. And what is it?

18 A. This is a transmittal notice for a state plan  
19 amendment filed in 2011. It is a companion piece to a  
20 different state plan that both speak to how  
21 uncompensated care payments were going to be made  
22 under the state plan amendment.

23 Q. Okay. And the --

24 A. State plan.

25 Q. I'm sorry. The companion state plan

1 amendment deals with inpatient services. This deals  
2 with outpatient services.

3 A. Outpatient, right. You have to file two  
4 separate ones.

5 Q. Okay. Thank you. So we see here on this  
6 transmittal notice there's a proposed effective date  
7 of December 14, 2011. And then let's scroll down to  
8 the redline version of page 1. There you go. Okay.

9 Now, we see a couple of things going on here.  
10 But if you look at the first sentence we see that --  
11 of paragraph 3, we see that the words "in annual" are  
12 stricken; is that correct?

13 A. That's correct.

14 Q. And then if we look at the third sentence we  
15 see that "annual" is stricken and "each year" is  
16 stricken, and the rest of that sentence is stricken in  
17 lieu of the words calendar year 2011.

18 THE COURT: 10.

19 Q. 10. I'm sorry. So the state plan had to be  
20 amended to strike out the words "annual", didn't it?

21 A. Yes, it did.

22 Q. Okay. Now, I would like you to take a look  
23 at the, while we're on this page, the redline --  
24 redlining of the paragraph above that.

25 Now, that's the language, isn't it, that the

1 state had relied on with respect to both revenue code  
2 510 and outpatient radiology; isn't that right?

3 A. Initially, yes.

4 Q. Okay. And that language is now out of the  
5 state plan, correct?

6 A. That is correct.

7 Q. And if we remember the commissioner's letter  
8 of last week, he promised that that state plan would  
9 be withdrawn, and it looks like the state actually had  
10 done that effective December 14th. Am I reading that  
11 correctly?

12 A. No, sir. I'm sorry. You're not. The  
13 effective date of December 14th is the date that we  
14 would want CMS, once they approved this page, to go  
15 back to. That date is important because December 15th  
16 is the day we made DSH payments to the critical access  
17 hospitals.

18 This particular paragraph, which goes back to  
19 the rev code 510 issue, CMS informed us as part of  
20 their process of working with the state that the  
21 08-017 state plan amendment was not needed for two  
22 reasons. One, the 510 billing was never allowed in  
23 the first place under the state plan, and the issue  
24 with the outpatient radiology I believe I explained.  
25 We thought we could be -- we could implement the fee

1 schedule, make the program more efficient.

2           After the financial management folks at CMS  
3 looked at it they asked the benefits folks to look --  
4 excuse me -- the benefits staff at CMS to look at it.  
5 It was not until that point, which was very recent,  
6 that we understood that they would not approve the fee  
7 schedule for outpatient radiology if we wanted to  
8 maintain those services as hospital outpatient  
9 services.

10           As a result, each of these state plan  
11 amendments builds on the other, and so that strikes  
12 this language from this specific most recent state  
13 plan amendment.

14           Q. Okay. I want to show you -- get back to the  
15 UPL issue, okay?

16           A. Sure.

17           Q. Let me show you what's been identified as 196  
18 for ID. That's Defendant's Exhibit 196.

19           MS. SMITH: You can strike the ID.

20           THE COURT: The ID may be stricken on  
21 Defendant's 196.

22           (Defendant's Exhibit 196 Admitted)

23           Q. Now, these are a series -- they appear to be  
24 a collection of public notices, and I would like to go  
25 to the one dated November 24, 2011.

1           Okay. In the package are a series of public  
2 notices, including the one on the screen now which was  
3 published on November 24, 2011, in the Nashua  
4 Telegraph. And the next page is one that appears to  
5 have been published on November 28th in the Union  
6 Leader.

7           And in the public notice -- it's a bit hard  
8 to read, but if you go down -- go down a little bit  
9 more. Okay.

10           Here we see that the state is saying:  
11 Additionally, the state plan will be amended to --  
12 it's in the first full paragraph on the screen, last  
13 sentence: Additionally, the state plan will be  
14 amended to remove the upper payment limit, UPL,  
15 language that is no longer relevant as described in  
16 the October 31, 2011 notice.

17           And if we scroll down to the end we see that  
18 the copies of draft state plan pages will be on file  
19 at the department, and the draft pages are expected to  
20 be available on December 1. Once they become  
21 available, comments will be accepted for two calendar  
22 weeks after the date of availability.

23           When were the state plan amendment pages  
24 available?

25           A. I believe they were available December 1st.

1           Q. Okay. And so anyone interested in commenting  
2 on the elimination of the language with respect to UPL  
3 had two calendar weeks, which would take you to  
4 December 15th, which was a day after it became  
5 effective, is that right -- the state plan amendment  
6 changes became effective?

7           A. Yes, sir.

8           Q. Okay. Now, let's go back -- since this  
9 notice references an October 31st notice, let's go and  
10 take a look at that. Let's go to the one in the  
11 Telegraph again. It's a bit easier to read. The last  
12 paragraph on the portion that's -- well, go down.  
13 There you go. This public notice generally discusses  
14 changes -- by the way, strike that, what was the  
15 effective date of the budget this year for fiscal 12?

16           A. July 1 of 2011.

17           Q. Okay. Going back to the notice, the 2010 UPL  
18 payment was not anticipated to be made in years other  
19 than 2010, and therefore there is no fiscal impact  
20 associated with this.

21                   The notice then goes on to describe fiscal  
22 impacts amounting to \$158 million. Is it your  
23 testimony that the elimination of UPL payments  
24 resulted in no fiscal impact of the state?

25           A. No. Excuse me. Yes, it is. The UPL

1 payments in 2010 generated \$20 million extra that went  
2 out to the hospitals.

3 In 2011 the aggregate amount of money  
4 available to make DSH payments was going to be the  
5 same regardless of whether we did UPL payments or DSH  
6 payments.

7 Q. But you are telling the public that as a  
8 result of the budget cuts there will be an estimated  
9 decrease in annual aggregate expenditures of  
10 \$158,963,135 in federal fiscal year 2012; is that  
11 correct?

12 A. That's correct. Because the funds would not  
13 be on the UPL side of the payment methodology, and  
14 therefore, relative to that specific change, that's  
15 how much money was impacted.

16 Q. Okay. Do you know Keith Hearle?

17 A. I have just met the gentleman, yes.

18 Q. Who is he?

19 A. I know that he is a consultant that was  
20 retained by the Department of Justice and has  
21 expertise in hospital finances.

22 Q. Did you meet with him?

23 A. No, I did not meet with him. I had a  
24 conference call with him.

25 Q. Who else was on the conference call?

1 A. Nobody. The two of us.

2 Q. So you had a telephone call with him.

3 A. I'm sorry. When we -- I was traveling at the  
4 time so I used a conference call number.

5 Q. I see.

6 A. I had a telephone call with Mr. Hearle.

7 Q. And what did you discuss with Mr. Hearle?

8 A. I recall that Mr. Hearle was asking me some  
9 background questions on the state Medicaid program and  
10 then asked questions relative to how we had redesigned  
11 our DSH program, asked me questions about the rate  
12 reductions. It was all background information.

13 Q. How long did the telephone call last?

14 A. That phone call lasted somewhere between a  
15 half hour and an hour. I don't recall, sir, the exact  
16 amount of time.

17 Q. Did you have any other communication in any  
18 form with Mr. Hearle?

19 A. None whatsoever.

20 Q. Did you tell Mr. Hearle that it was the  
21 intent of the state to make UPL payments only once?

22 A. Yes, I did. And I explained why.

23 Q. So you felt comfortable speaking on behalf of  
24 the state in expressing what the intent of the state  
25 was?

1 A. Yes, sir.

2 Q. You had felt comfortable expressing the  
3 opinion of the Governor and the legislature and 424  
4 members of the state legislature, I take it?

5 A. No. I felt comfortable responding to those  
6 questions as medicaid director for the state with the  
7 understanding of how I thought the program was going  
8 to be implemented in this current state fiscal year.

9 Q. Did you tell Mr. Hearle that a state plan  
10 amendment would be required to change the UPL  
11 methodology?

12 A. I believe -- if he asked that question, then  
13 I would have answered yes.

14 Q. Did you tell him that, though?

15 A. I don't recall, sir.

16 Q. Okay. Let's take a look at Exhibit 45.  
17 Exhibit 45 appears to be another PowerPoint  
18 presentation, or a series of slides, this time  
19 presented to the house finance -- Division III of the  
20 House Finance Committee; is that right?

21 A. Yes, sir.

22 Q. And Division III deals with the Department of  
23 HHS; is that correct?

24 A. Yes, sir.

25 Q. And this is dated February 7, 2011. And did

1 you help prepare this?

2 A. Yes, I did, sir.

3 Q. And did you actually appear before Division  
4 III on February 7, 2011?

5 A. Yes, I did.

6 Q. I would ask you to look at page 7, please.

7 What was the purpose of your presentation to Division  
8 III?

9 A. Well, similar to the one in Senate, we had a  
10 group of new legislators so we did an educational  
11 session with both bodies. After the first -- there  
12 were three educational sessions with the House. After  
13 the first one we came back on this date to do some  
14 follow-up.

15 On the previous date when we were there we  
16 didn't have a chance to talk about disproportionate  
17 share payments, so we did this presentation, and  
18 subsequently they asked us to actually do a much  
19 longer presentation.

20 Q. Thank you. So here you are presenting to  
21 Division III some background on the disproportionate  
22 share hospital program, otherwise known as DSH, and  
23 the first bullet point says that DSH payments provide  
24 financial assistance to qualifying safety net  
25 hospitals that serve a large number of low income

1 patients, such as possible with Medicaid and the  
2 uninsured. It's existed since 1981. And then the  
3 second dash down says: Medicaid is included in  
4 uncompensated care because payments frequently do not  
5 cover the costs of care provided. And that's an  
6 accurate statement, isn't it?

7 A. Yes. It's often referred to as Medicaid  
8 losses.

9 Q. Now, the next bullet point: Over the years  
10 national policymakers have grappled with a variety of  
11 issues regarding Medicaid DSH. And you recite a rapid  
12 growth in spending. I take it that's on a national  
13 basis.

14 A. Yes, sir.

15 Q. And it says that there is concern with  
16 inappropriate targeting and use of DSH funds. What  
17 are the concerns or the issues surrounding the  
18 inappropriate targeting and use of DSH?

19 A. In this specific context it had to do with  
20 the fact that the ACA was looking at -- excuse me. I  
21 should use the whole acronym. The Patient Affordable  
22 Care Act has language in it that requires the  
23 Secretary to actually do a significant reduction in  
24 the DSH program.

25 And one of the questions New Hampshire

1 received was did we -- they wanted us to tell them why  
2 we had designated all of our hospitals as DSH  
3 hospitals. That's not a common practice. And we were  
4 asked that inquiry. And then we got into the  
5 conversation with them that went on to talk about what  
6 New Hampshire specifically was being looked at back in  
7 2004.

8 Q. And the DSH program was under intense  
9 scrutiny by CMS; is that right?

10 A. Yes, sir.

11 Q. In New Hampshire?

12 A. In New Hampshire. Other states as well, but  
13 I can only speak to New Hampshire.

14 Q. Okay. Let's go to slide 12. Slide 12 says:  
15 Up until October 2010, a hospital's DSH payment for  
16 uncompensated care provided equal the MET paid by an  
17 individual hospital.

18 A. That's correct.

19 Q. And the MET is the Medicaid enhancement tax  
20 payments that hospitals are required to make under  
21 state law; is that right?

22 A. That's correct.

23 Q. And then you describe a major effort to  
24 reform the DSH program, and you cite to an OIG audit  
25 of 2004. And there was an OIG audit of New

1 Hampshire's Medicaid program; is that right?

2 A. That's correct, sir.

3 Q. And what was the result of that audit?

4 A. The results of that audit were that the  
5 Office of the Inspector General's opinion provided to  
6 CMS was that the state had overpaid hospitals -- had  
7 overpaid in DSH payments to the hospitals, and that in  
8 doing so we owed -- the state owed the federal  
9 government \$35 million in a disallowance. That report  
10 went to CMS, and then it becomes CMS's responsibility  
11 to decide what action to take after that.

12 Q. Okay. Let's go to slide 17. This is  
13 captioned "The Uncompensated Care Calculation".

14 A. Uh-huh.

15 Q. And DHHS can only reimburse up to the amount  
16 of a hospital-specific DSH limit. And that's based on  
17 the cost of inpatient and outpatient services provided  
18 by each hospital, and it includes Medicaid losses?

19 A. Uh-huh.

20 Q. Which is the difference between Medicaid  
21 loss, cost, minus what hospitals get paid; is that  
22 correct?

23 A. Yes, it is, sir.

24 Q. Let's go to slide 19. Now, this is a little  
25 bit hard to read, but this shows the history of the

1 DSH program in New Hampshire in terms of DSH payments  
2 made, tax payment, meaning the payments made by the  
3 hospitals under the MET, and then what was generated  
4 for the general fund; is that correct?

5 A. That's correct.

6 Q. And if you look at the subtotal as of  
7 November 19, 2010, it's almost \$1.8 billion.

8 MS. SMITH: I just don't know where we're  
9 going with this. I don't know how it's relevant to  
10 any decrease in DSH or MET that's at issue in this  
11 lawsuit.

12 THE COURT: Well, I agree. I can't help you  
13 with -- Mr. MacDonald, why is it relevant?

14 MR. MACDONALD: I'll move on.

15 Q. Let's take a look at Exhibit 47. Do you  
16 recognize this document?

17 A. Yes, sir.

18 Q. What is it?

19 A. It's a document that the Department of Health  
20 and Human Services utilizes as a reference document  
21 with the legislature when they are considering our  
22 budget.

23 Q. Okay. And it says -- it's another  
24 presentation to Division III, and it says on the front  
25 page that HHS was requested to present to Division III

1 various options to reduce general fund demand for  
2 fiscal years 12 and 13, and that this -- by up to  
3 \$200 million; is that right?

4 A. That's correct, sir.

5 Q. And that's -- the purpose of this document is  
6 to present some options; is that correct?

7 A. This document was married to a spreadsheet  
8 very similar to the one -- oops, I'm sorry. I just  
9 spilled the water there. Very similar to -- I'm  
10 sorry -- very similar to exhibit what was 199. It was  
11 married to a spreadsheet like that.

12 And so what this larger document did, sir,  
13 No. 47, was to -- why don't I fix that. I'm sorry. I  
14 apologize.

15 MS. SMITH: Why don't you just take a break  
16 and deal with that.

17 THE WITNESS: I almost have it. Thank you.  
18 I'm very sorry, counsel. I'm very sorry.

19 THE COURT: It's not a problem. Don't worry  
20 about it.

21 A. So I was saying that this is a companion  
22 document to that spreadsheet so that -- what the House  
23 had requested was they wanted to be able to have a  
24 reference document that they could look up a  
25 particular budget reduction and use it as part of

1 their decision making process.

2 Q. Okay. Let's scroll through this document,  
3 and you've got the physical document in front of you.

4 A. Yes.

5 Q. And do you see the spreadsheet you're talking  
6 about, pages 2, 3 and 4?

7 A. Yes, sir.

8 Q. Okay. So that's the spreadsheet on the  
9 screen. I would like to go to the first page of text.  
10 It's page 8 of 84, and is this part of the -- I assume  
11 you did not -- you did not yourself create the  
12 entirety of Exhibit 47.

13 A. No, sir. I didn't.

14 Q. Did you participate in any of the preparation  
15 of this document?

16 A. Yes, I did, sir.

17 Q. And did you participate in the preparation of  
18 page 8 of 84, which is now --

19 A. I did, sir.

20 Q. Okay. And did you actually write this text?

21 A. No. It was drafted by one of my staff  
22 members. I reviewed it and approved it.

23 Q. Okay. And here we have a summary of a  
24 proposal, as I understand it, to eliminate  
25 uncompensated care funding all together; is that

1 correct?

2 A. That's correct.

3 Q. And it gives a brief summary of what the  
4 Governor had proposed in his budget.

5 A. Uh-huh.

6 Q. And then it describes this reduction as  
7 essentially directing all of the MET revenue to the  
8 general fund and eliminating the non-federal match  
9 required for the disproportionate hospital payments.  
10 And the effect would be essentially that the hospitals  
11 would continue to pay the MET but not get the DSH  
12 payments back; is that correct?

13 A. That's correct.

14 Q. Okay. And if we could just take a quick look  
15 at Exhibit 62, and here I would like to use the  
16 document camera. I'm presenting you with the actual  
17 Exhibit 62. Do you recognize Exhibit 62?

18 A. I do, sir.

19 Q. And what is it?

20 A. This was a spreadsheet that my office created  
21 in order to calculate -- not just calculate but also  
22 to share information with the hospitals in terms of  
23 the DSH payments that were made to the critical access  
24 hospitals in December.

25 Q. Okay. The spreadsheet, or at least the copy

1 we have, is a little hard to read, but let's just walk  
2 through it together.

3 Right here we have hospital name, and you  
4 would agree that those are the 26 acute care hospitals  
5 in the state of New Hampshire?

6 A. It also, I believe, includes two rehab  
7 hospitals. So it's the 26 plus the two rehabs.

8 Q. Okay. And the -- you're right, and I'm  
9 sorry. And the hospitals listed at the top of the  
10 page are the critical access hospitals; is that  
11 correct?

12 A. Yes, sir.

13 Q. And the hospitals at the bottom of the page  
14 are the non-critical access hospitals, correct?

15 A. Yes, sir.

16 Q. And they include the ten plaintiffs in this  
17 case?

18 A. Yes, sir.

19 Q. Okay. The next column is DSH category, and  
20 CAH means critical access hospital, correct?

21 A. Yes, sir.

22 Q. And for the non-critical access hospitals it  
23 says deemed TBD.

24 A. That's correct.

25 Q. And I believe that goes to an issue that came

1 up earlier today, and we'll get to that.

2 A. Okay.

3 Q. The next column is uncompensated uninsured  
4 care costs, and that, I take it, represents the  
5 state's data gathered from the individual hospitals  
6 about what their uncompensated care is for the  
7 uninsured. Is that a fair statement?

8 A. One slight clarification, if I may, counsel.  
9 It's the data that was reported to us by the  
10 hospitals, and we have summarized it on this  
11 spreadsheet.

12 Q. Okay. And the next column summarizes data  
13 about uncompensated Medicaid; is that right?

14 A. Yes, sir.

15 Q. Okay. And then the next column is total  
16 uncompensated care. Then the next column is DSH  
17 payment, and then the next column is the projected  
18 payment under the Medicaid enhancement tax; is that  
19 right?

20 A. No. Column G --

21 Q. Yes.

22 A. -- is the data that was gathered from the  
23 hospitals in terms of their reporting of their  
24 projected tax liability, their tax payment, and that's  
25 done by the Department of Revenue Administration.

1 Q. Okay. Thank you. And then the final column  
2 is captioned, Projected Net Position Based on Reported  
3 NPSR, and NPSR is net patient service revenue?

4 A. Correct.

5 Q. And this spreadsheet reflects DSH payments  
6 going out to critical access hospitals in the amount  
7 of \$48,735,473; is that right?

8 A. That's correct.

9 Q. And those payments were actually made on or  
10 about December 15th of 2011?

11 A. Yes, sir.

12 Q. And then immediately below that you see that  
13 no DSH payments were made to the non-critical access  
14 hospitals, correct?

15 A. That's correct, sir.

16 Q. Subject to a holdback, it looks like, of  
17 \$500,000; is that right?

18 A. That's correct, sir.

19 Q. And that \$500,000 will be distributed to  
20 hospitals which are so-called deemed status hospitals;  
21 is that right?

22 A. That's correct, sir.

23 Q. So that the net is that that \$500,000 will be  
24 distributed among some but probably not all of the  
25 critical access hospitals?

1           A. I would say it will be very few, actually,  
2 will meet the criteria.

3           Q. And that's a criteria set forth in CMS  
4 regulations; is that right?

5           A. Yes, sir.

6           Q. And the net position, the column on the far  
7 right, reflects the DSH payment less the amount that  
8 the hospital is paid in MET; is that right?

9           A. Yes, sir.

10          Q. Okay. And so the net for the critical access  
11 hospitals is roughly \$25 million?

12          A. Yes, sir.

13          Q. You go down to the net for the non-critical  
14 access hospitals, it says it's zero, but I think we  
15 could agree that it's really a substantial number in  
16 the negative, isn't that right, because they are not  
17 receiving any DSH payments but are continuing to pay  
18 the MET?

19          A. For net position, yes, that would be true,  
20 sir.

21          Q. And I'll just represent to you, having done  
22 the math, and I won't spend the time on it, that as to  
23 the ten plaintiffs that number instead of zero should  
24 be \$127,494,293.

25               MR. MACDONALD: And I believe -- has the

1 state agreed to this exhibit?

2 MS. SMITH: Yes. We stipulated to that  
3 exhibit.

4 MR. MACDONALD: Okay.

5 THE COURT: What's the number?

6 MR. MACDONALD: 62.

7 THE COURT: ID may be stricken on 62.

8 (Plaintiff's Exhibit 62 Admitted)

9 MR. MACDONALD: Okay. Can we go back to  
10 Exhibit 47 and the page we were on.

11 THE COURT: Again, I'm just confused about  
12 the MET. It's a tax imposed by the state that  
13 collects it, right? That's not an issue here?

14 MR. MACDONALD: No. I'm getting to it.

15 THE COURT: Okay.

16 Q. The proposal that you were discussing to the  
17 House Finance Committee, Division III, was to pay the  
18 MET but not get the DSH. And we see, if you scroll  
19 down, there's a section called Estimated Impact to  
20 Clients, Providers and Communities, and it says:  
21 Uncompensated care payments made to hospitals to  
22 provide compensation for inpatient and outpatient  
23 services provided to our state's uninsured. Last year  
24 the hospitals provided \$299 million of uncompensated  
25 care and we were reimbursed \$207 million, leaving

1 \$92 million worth of care uncompensated. Elimination  
2 of the DSH funding will have a significant fiscal  
3 impact on hospitals in that it will downshift the  
4 financial responsibilities to the hospitals.  
5 Presumably the hospitals will pass some of these costs  
6 on to privately insureds through their contracts  
7 negotiated with insurance companies, thus resulting in  
8 a cost shift and increasing commercial health  
9 insurance premiums. However, not all hospitals have  
10 the capability to shift costs to commercially insureds  
11 due to the population that utilizes their services.  
12 There is a strong possibility that this reduction  
13 could result in a hospital's inability to sustain  
14 operations and therefore close; is that correct?

15 A. That's correct.

16 Q. And that's what you told the House Finance  
17 Committee?

18 A. That's what we told the House Finance  
19 Committee when they asked us about this particular  
20 option within the budget; yes, sir.

21 MR. MACDONALD: Your Honor, I pass the  
22 witness.

23 THE COURT: All right. Who is taking the  
24 witness? Attorney Smith?

25 MS. SMITH: We have one witness that we have

1 to get done today. We had agreed to start him at  
2 3:00, and it's almost that. So rather than do 20  
3 minutes of Ms. Dunn, I would prefer to call Mr. Hearle  
4 and then go back to Ms. Dunn when we get done.

5 THE COURT: That's fine with me if it's okay  
6 with you.

7 MR. O'CONNELL: It's all right.

8 THE COURT: Sorry, Ms. Dunn. We keep  
9 interrupting you.

10 THE WITNESS: That's okay. Should I just  
11 leave these here?

12 THE COURT: Oh, please.

13 MS. SMITH: The state calls Keith Hearle.

14 KEITH HEARLE

15 having been duly sworn, testified as follows:

16 THE CLERK: Would you please state your name  
17 and spell your last name for the record, please.

18 THE WITNESS: Keith W. Hearle, H-E-A-R-L-E.

19 DIRECT EXAMINATION

20 BY MS. SMITH:

21 Q. Mr. Hearle, could you please tell the Court  
22 what you do for a living?

23 A. I have a consulting firm based in Alexandria,  
24 Virginia, that focuses in on hospital finance,  
25 healthcare policies as it relates to hospitals, the

1 community benefit obligations/expectations of  
2 hospitals that are tax exempt, and those types of  
3 matters.

4 Q. And were you retained in this case to look at  
5 information related to the complaint of the hospitals  
6 in this lawsuit?

7 A. I was.

8 Q. And have you prepared a report that you  
9 provided to the state?

10 A. I did.

11 Q. And there are some white notebooks back  
12 there, and we'll also get it on the screen in front of  
13 you. Is your report what we've marked for  
14 identification as Exhibit 200?

15 A. Yes. That's the one.

16 Q. Maybe I can shorten the questioning a little  
17 bit. The first four pages of your report summarize  
18 your qualifications, correct?

19 A. They do.

20 MS. SMITH: And is the plaintiff going to  
21 have any objection to Mr. Hearle being qualified as an  
22 expert?

23 MR. O'CONNELL: We have no objection to him  
24 being qualified. We only reserve rights to object to  
25 some opinions.

1           THE COURT: All right.

2           Q. And what were you asked to look at and what  
3 were you asked to provide opinions on in this case?

4           A. I was asked to review certain financial  
5 information contained in declarations provided by the  
6 hospitals, other financial information that is  
7 publicly available, to review other documents, certain  
8 testimony, to interview Ms. Dunn, and to prepare the  
9 report.

10          Q. And did you provide in your report a list of  
11 all of the things that you looked at that went into  
12 forming your opinions?

13          A. I did. That is listed in Exhibit A to the  
14 report. However, I also have looked at some recently  
15 submitted information, supplementary declarations,  
16 those types of things.

17          Q. What are the conclusions -- did you state in  
18 your report the conclusions that you have reached as a  
19 result of the work that you performed?

20          A. I did. Those conclusions are summarized on  
21 page 8 of the report. The first conclusion is  
22 regarding some of the values reported in the  
23 declarations.

24               There are numbers regarding Medicaid payment,  
25 Medicaid cost reported by each of the hospitals, and I

1 spent some time trying to validate those numbers by  
2 comparing them to similar numbers reported in other  
3 data sources. And the first conclusion is that it was  
4 difficult to validate those numbers that were filed  
5 with the original declarations.

6 Q. We talked about some of this -- you talked  
7 about some of the specifics that you looked at further  
8 in the report, correct?

9 A. I do.

10 Q. Okay. We'll come back to that. I just want  
11 to get the general conclusions out first.

12 What was the next conclusion you reached as a  
13 result of the information you reviewed?

14 A. The second -- when I was reviewing the  
15 original declarations, I was uncomfortable with the  
16 way that the rate impact information was presented,  
17 specifically with respect to the upper payment limit  
18 funding not being shown as an offset to some of the  
19 other rate actions that the state implemented, and  
20 then how it was reported in years when it no longer  
21 became available.

22 Q. And what other conclusions did you reach?

23 A. I compared the profit levels of hospitals in  
24 New Hampshire to profitability of hospitals in other  
25 states and found that historically the hospitals in

1 New Hampshire have been more profitable than others in  
2 New England.

3 MR. O'CONNELL: Your Honor, we object to that  
4 opinion and would ask that it be stricken. It has no  
5 relevance to the analysis before the Court. The Court  
6 has heard about what the standard is for 30(a), 13(A),  
7 and profitability is not among those standards, and a  
8 comparison to hospitals outside of New Hampshire has  
9 no relevance on your analysis of this case.

10 THE COURT: Well, I think it actually is  
11 relevant. It goes back I think to your own contention  
12 that these rates are violative of 30(a) in that they  
13 aren't sufficient to provide access to available  
14 medical services and so forth. And your position is,  
15 sure they are if they use their profits to subsidize  
16 them, right?

17 MS. SMITH: That's correct.

18 THE COURT: Objection overruled.

19 MS. SMITH: And also testimony that the  
20 department did consider the impact on access by  
21 looking at the hospital's profitability. It validates  
22 that.

23 THE COURT: I mean, New Hampshire hospitals  
24 in gross versus Massachusetts' hospitals in gross  
25 isn't particularly persuasive evidence, but to the

1 extent it's relevant, it's relevant.

2 Q. And what other conclusions did you review --  
3 reach as far as the hospitals' sources of losses?

4 THE COURT: When you say the hospitals, who  
5 are you talking about, these plaintiffs as compared  
6 to --

7 MS. SMITH: The plaintiffs' sources of  
8 losses.

9 MR. O'CONNELL: Well, that's not actually  
10 what the report says, your Honor, but I can take that  
11 up on cross-examination.

12 A. I concluded that the hospitals in New  
13 Hampshire on average have fewer Medicaid patients in  
14 their payer mix, but that also the hospitals are  
15 struggling both with Medicare losses in addition to  
16 Medicaid losses. So financial challenges are not only  
17 associated with Medicaid.

18 Q. And I think the last conclusion that you  
19 stated in your report was in relation to community  
20 benefits, correct?

21 A. It is.

22 Q. Do you have a particular expertise regarding  
23 the community benefits field?

24 A. I do. I participated in work with the  
25 Catholic Health Association in the late 1980s to

1 develop the first accounting and reporting framework  
2 for community benefit.

3           If you fast forward to the most recent  
4 periods, I've been working directly with the IRS on  
5 how to report community benefit in what's known as IRS  
6 form 990, Schedule H. I've worked with them on  
7 instructions to that form, have worked with Senate  
8 Finance Committee staff as they've considered the  
9 evolving standards that hospitals need to meet --  
10 exempt hospitals need to meet at a federal level to  
11 keep qualifying for that exempt status.

12       Q. And what was your conclusion regarding --  
13 what conclusions did you reach regarding these  
14 hospitals' actions in relation to their community  
15 benefit reporting?

16       A. The conclusion is that tax exempt hospitals  
17 like the plaintiffs have an expectation that they  
18 provide community benefits, and that expectation is at  
19 a state level and at a federal level. The amounts to  
20 be provided have not been specified anywhere in  
21 federal law or regulations. However, there is a  
22 presumption that to be tax exempt in return for those  
23 tax benefits, not paying income tax, property tax,  
24 those types of things, certain community benefits are  
25 to be provided, and those include providing Medicaid

1 services at a loss, providing charity care that is not  
2 fully reimbursed, those types of activities.

3 Q. Okay. Going to the specifics, supporting  
4 those conclusions, don't you lay those out in the rest  
5 of your report, correct?

6 A. I do.

7 Q. Turning to the first of those, which is your  
8 analysis regarding -- looking at the financial -- was  
9 that in regard to financial declarations that were  
10 given to you that the plaintiffs had submitted in  
11 support of their pleadings for the summary injunction?

12 A. That's correct. I believe those were filed  
13 in July, August 2011, something like that.

14 Q. And you've been provided the subsequent  
15 declarations that have been filed since then?

16 A. I have.

17 Q. What did you do to try to validate those  
18 declarations?

19 A. The first thing was to enter all the numbers  
20 into a spreadsheet and then to pull together  
21 comparative information from three sources.

22 The first being IRS form 990, Schedule H,  
23 which I know quite well having done as much as I have  
24 with the Service on that particular reporting  
25 framework.

1           The second is community benefit reports that  
2 the hospitals file with the state of New Hampshire.

3           And the third is Medicare cost report  
4 information that the hospitals file with the state to  
5 claim Medicaid outpatient reimbursement.

6           So I organized all those three resources  
7 together and looked to see if the numbers originally  
8 filed aligned with those other data sources.

9           Q. And what are your conclusions?

10          A. The conclusions are that there are some  
11 differences, there are some variances between the data  
12 sources, and the variances would be easier to  
13 understand if the methodologies for putting costs to  
14 Medicaid services -- the sources of the information  
15 were better disclosed or outlined in the original  
16 declarations.

17          Q. Did you set forth your comparison in various  
18 tables in the report?

19          A. I did.

20          Q. Can you go through those tables and tell us  
21 what they are and what conclusions you drew from each  
22 of those tables?

23          A. Table 1 contains values from the original  
24 declarations. We have Medicaid cost for each of the  
25 hospitals for 2009 and 2010, the Medicaid payments for

1 those same two fiscal periods. The difference being  
2 the reported Medicaid loss in the declarations for all  
3 of the different categories that have been discussed,  
4 inpatient, outpatient, psych ward, that was in, all  
5 the different categories that are covered in the  
6 declarations.

7           One conclusion from this table is that  
8 hospitals are losing money on their Medicaid rates. I  
9 didn't put totals in this table. If I had, the  
10 Medicaid cost numbers would be roughly 220 million for  
11 2009, 250 million for 2010. The Medicaid payment  
12 numbers are roughly a hundred million in each of those  
13 two years, and so the difference is a loss that the  
14 hospitals incur when they serve Medicaid patients and  
15 get reimbursed based on rates in the state. So those  
16 are conclusions from table 1.

17           Table 2 compares Medicaid losses -- presents  
18 Medicaid losses as reported in most recent IRS form  
19 990, Schedule H filings by hospital. And what we see  
20 here is that the losses and the declarations for I  
21 believe seven of the ten hospitals are greater than  
22 the losses reported in Schedule H. For three of the  
23 hospitals the losses are lower in the declarations  
24 than what appears in Schedule H.

25           And I'll just give you some examples. The

1 loss for Mary Hitchcock Memorial Hospital, 52 million  
2 for 2009, 71 million for 2010. When we go to Schedule  
3 H, that number is roughly 39 million for its fiscal  
4 2010.

5 Now, there are some reasons why a variance  
6 like this might occur relating to the organization  
7 that's actually filing the 990. It may be that the  
8 physician group is outside of that 990. But again,  
9 these are explanations that could be better laid out  
10 in the information submitted by the plaintiffs.

11 Q. And did you actually look at Southern New  
12 Hampshire to see whether the losses it claimed from  
13 other parts of its organization accounted for that  
14 variance?

15 A. I did. When we looked back at table 1 for  
16 Southern New Hampshire, the loss reported for 2010 is  
17 12.6 million. When we go to Schedule H, it's 7.7  
18 million. So I wonder, well, is it the physician  
19 practice that might account for the difference. And I  
20 could not account for the entire difference in that  
21 one category of Southern New Hampshire's activities,  
22 but it did explain a big chunk of the variance.

23 Q. And I think -- what did you look at that you  
24 refer to in table 3?

25 A. Table 3 summarizes what the hospitals

1 submitted to the state in their community benefits  
2 reporting forms, and we see similar variances between  
3 the declaration information and those community  
4 benefit forms as well.

5 Mary Hitchcock, for example, 2010 the loss is  
6 at 62.5 million. Going back to the declaration, it's  
7 71.2 million. Again, there could be differences in  
8 what activities are covered by both reports, but the  
9 variances are not explained.

10 Q. And was there a trend in which direction the  
11 variances were -- which source of information claimed  
12 greater losses?

13 A. In general, the declarations reported the  
14 highest losses of any of these other sources. There  
15 is a significant difference for Southern New  
16 Hampshire. If we look at table 3, the reported loss  
17 is 2 million. The declaration is again 7.7 million.

18 Q. So these weren't just a few dollars off, some  
19 of them were millions of dollars off?

20 A. That's correct.

21 Q. And the fourth table you looked at Medicaid  
22 outpatient cost records?

23 A. I did. I requested data from the department  
24 which would be the actual Medicare cost report filings  
25 submitted to the department to claim the Medicaid

1 outpatient reimbursement. It is that Medicare cost  
2 report, plus another schedule, that gets submitted for  
3 that purpose.

4           And here on table 4 I'm comparing the  
5 outpatient cost figure reported in the declarations  
6 for Medicaid to the filings that are on file at the  
7 department used to actually claim the reimbursement.  
8 And some of them are very much right on the money, so  
9 it's clear that the hospitals relied on their cost  
10 report filings for that data source. But there are a  
11 few where we do see variances, such as Southern New  
12 Hampshire again, 5.3 million is the amount of cost in  
13 the declaration, where the cost report that was used  
14 to claim the reimbursement said 4.6.

15           Q. And you said you were asked to look at the  
16 supplemental declarations that have been submitted,  
17 correct?

18           A. Yes.

19           Q. I'm going to ask you to look at the ones  
20 regarding Mr. Lipman from LRGH. I think that's  
21 Exhibit 76 through 78. And if you can look at -- I  
22 think it's table 5 in the original declaration, which  
23 is 76, and how have the numbers in that changed in the  
24 declarations, and can you tell us any conclusions that  
25 you draw based on those changes?

1           A. Table 5 in Exhibit 76 portrays the originally  
2 estimated impact of rate reductions on Lakes Region  
3 Hospital. The amount when you tally it up across the  
4 2008 through 2013 time frame adds up to 33.7 million.

5           When I saw this portrayal of the impact and  
6 saw this as a similar analysis across all of the  
7 hospitals, it raised that second concern that I  
8 mentioned at the beginning of my comments with respect  
9 to how the upper payment limit funds were reported.

10           That UPL funding of 4.6 million is presented  
11 in 2011 as a negative number when in fact it was a  
12 positive revenue source that came in during that one  
13 fiscal year for the organization. So that raised that  
14 as a concern in this part of the assessment.

15           Q. And how would you -- how do you think it  
16 should have been characterized? Should it have been  
17 characterized differently to be more accurate?

18           A. I would have characterized -- made two  
19 changes. The first is to reverse the sign on the UPL  
20 dollars for 2011, which of course swings that  
21 \$33.6 million impact by \$9 million.

22           The second I would do is to take the negative  
23 numbers in 2012 and 2013 and make them zero. What  
24 happens here is we have a positive amount of revenue  
25 coming into the organization in 2011. Then in 2012

1 and 2013 that positive revenue no longer is present.

2 So you've reduce the positive impact to zero in those  
3 two years, and that's a fairer way to present the  
4 impact of the state's rate decisions.

5 Q. And comparing that initial declaration to the  
6 subsequent ones, what do the subsequent -- what impact  
7 do the subsequent declarations have on the conclusions  
8 that you've stated?

9 A. Looking at Exhibit 77, which I see was filed  
10 in November -- I don't believe this has the specific  
11 table that --

12 Q. Okay. I apologize. I have the numbers  
13 written as 76, 78 and 79 that I need to show you. I  
14 may have given you the wrong ones. If you could look  
15 at 78?

16 A. So looking at 78 --

17 Q. Does that have the revised declaration?

18 A. It does. It's a revised table 5. This table  
19 shows the UPL dollars for 2011 no longer being  
20 negative. It shows that as being zero. The total  
21 impact is reduced from 33.7 million from the previous  
22 table to 17.8 million.

23 Q. Let me show you what they have marked as  
24 Exhibit 79, which they've represented is a chart of  
25 Lakes Region's claimed losses. How does that differ

1 from Exhibit 78?

2 A. So in Exhibit 79 the upper payment limit  
3 dollars now are not negative. They are not zero.  
4 It's a positive 4.1 million. We still have negative  
5 numbers in for 2012 and 2013. I would argue that the  
6 impact on Lakes Region was positive 4.1 in 2011 and  
7 then zero in 2012 and 2013. So the bottom right-hand  
8 corner number would be the 11.6 million associated  
9 with the other rate reductions minus the benefit of  
10 the UPL funds for that one year, or roughly 7.5  
11 million.

12 So the Lakes Region impact would go from 33.7  
13 to 19 something to 15.7, and I would argue to 7.5 if  
14 this were portrayed in the way that I would view as  
15 more reasonable.

16 Q. Okay. So I think we've also covered your --  
17 just to move this discussion along, we've also covered  
18 your conclusions regarding how the upper payment limit  
19 should have been portrayed on the financial  
20 declarations, correct?

21 A. Yes.

22 Q. Are you familiar with how UPL and DSH are  
23 paid in other states across the country?

24 A. Somewhat familiar. Not every state and not  
25 in great detail, but yes, I am.

1 Q. You've heard testimony I think that UPL is to  
2 fill the entire gap between what Medicaid pays and the  
3 upper payment limit. Is that what happens across the  
4 country, to your knowledge?

5 A. That is the maximum amount of payment that  
6 can be made by a state to bring the Medicaid rates up  
7 to the level of Medicare rates for similar services.  
8 So the upper payment limit is the Medicare rates. The  
9 amount that a state can provide for hospitals varies  
10 depending on the particular program and budget  
11 circumstances.

12 Q. And did you present a table where you portray  
13 what you think an alternate portrayal of the rate  
14 reduction should be in your report, and can you just  
15 point us to where that is?

16 A. I did. Table 5 of the report summarizes what  
17 was in the original declarations in terms of the rate  
18 reductions and the financial impact on the hospitals.  
19 It shows numbers ranging from 6 million for 2008 up to  
20 99 million on an annual basis in 2013.

21 The upper payment limit number in 2011 is  
22 negative. Even though it was a positive revenue  
23 stream that came into the hospitals in that year, the  
24 numbers for 2012 and 13 are still negative. So I  
25 restated these numbers to reflect the concerns that

1 I've raised in table 6. Over time that takes the  
2 cumulative value of the numbers from what was stated  
3 as 310 million across the declarations to something  
4 more like 83 million.

5           The other observation I would have is I  
6 almost wish I had put a solid line in between 2011 and  
7 2012. 2008 through 11, we can view that as history.  
8 And if we look at the cumulative numbers only through  
9 2008 and 2011, I believe when you add in table 6, the  
10 negative 6, negative 17, negative 28, positive 34, all  
11 together we end up with a negative 17 million as the  
12 impact from 2008 through 2011.

13           Then upon thinking about it more, 2012 and 13  
14 are projected numbers projected by the hospitals. All  
15 of these would be impacted if all of the patients  
16 remained in fee-for-service Medicaid. Many of them  
17 would not be going into managed Medicaid.

18           So there's a question that came into my mind  
19 about what happens when New Hampshire implements  
20 Medicaid managed care sometime in 2012, what kind of  
21 rates the plans will actually be negotiating with the  
22 hospitals and would those rates be based at all on the  
23 fee-for-service rates that are in question here.

24           Q. You opined that based on the information you  
25 have reviewed that the financial health of New

1 Hampshire hospitals was better than other national  
2 hospitals or similarly situated hospitals?

3 A. Yes. The Medicare cost report includes  
4 income statements and balance sheets for every  
5 hospital that files a Medicare cost report, and that's  
6 publicly available through CMS. So I downloaded all  
7 the cost reports for all of the hospitals in the  
8 country and summarized their financial information  
9 here on table 7.

10 What we have here is the total margin, the  
11 net income for each hospital aggregated to a state  
12 level. What this shows is that in 2009 New Hampshire  
13 hospitals had a total margin of approximately 5.1  
14 percent. That compares to a New England average of  
15 1.6 percent including New Hampshire, 1.3 percent  
16 excluding New Hampshire. So on that basis I concluded  
17 that historically the hospitals have been more  
18 profitable than neighboring hospitals in this part of  
19 the U.S.

20 Across the U.S. the overall total margin  
21 averaged around 6 percent. So slightly less than the  
22 U.S. average but healthier than other facilities in  
23 New England.

24 Q. And in table 8 you also looked at another  
25 source of information about hospital profitability?

1           A. I did. I reviewed audited financial  
2 statements filed with I believe it's charitable trusts  
3 in the Attorney General's Office and summarized  
4 operating revenue and operating income for each of the  
5 systems or organizations that are part of this  
6 complaint here in table 8.

7           So in 2009 we see that all -- each of the  
8 organizations did have a positive operating income  
9 reported. Overall, around \$101 million of operating  
10 income. That's a different number than the net  
11 income. The difference being non-operating items,  
12 interest earnings and other categories of items. But  
13 the operating income was roughly 2.9 percent across  
14 the hospitals and healthcare systems in 2009.

15           In 2010 Lakes Region did report a negative  
16 operating income of 2.3, and two of the organizations  
17 had not yet filed the audited financials with the  
18 state.

19           Again, as I think about these numbers and I  
20 think about the DSH resource that may go to zero, if  
21 that truly is \$130 million impact on the  
22 organizations, we put that in context with these  
23 operating income numbers and it clearly would be a  
24 significant impact on the hospitals in terms of their  
25 financial well-being.

1           Q. But this shows that up through 2010 at least  
2 almost all of the hospitals still -- just on their  
3 operating budget -- and they have other sources of  
4 income, as well, right?

5           A. Non-operating sources, correct.

6           Q. But just on their operating budget they were  
7 still generating a profit on their operating margins  
8 even after it went to these reductions that we've been  
9 talking about?

10          A. That's correct. These are after the rate  
11 reductions that have been discussed. So those rate  
12 reductions were, many of them, in effect in 2009 and  
13 in 2010.

14          Q. And you also talked about whether or not  
15 Medicaid was the only source of losses to the  
16 hospital. What did you review in that respect?

17          A. The community benefit filings -- the  
18 community benefit reports filed by the hospitals also  
19 include information about Medicare revenues and costs  
20 in addition to Medicaid revenues and costs. So table  
21 11 summarizes what the hospitals submitted to the  
22 state in terms both of Medicaid and Medicare.

23                 We've aggregated here -- it's one year of  
24 information for each hospital, different fiscal  
25 periods depending on the most recently filed

1 information. So the most recent information, whether  
2 it's fiscal 2011 or fiscal 2010, indicates that the  
3 hospitals collectively would have lost around 215  
4 million from Medicare, around 136 million in Medicaid.

5 Q. So do I understand correctly that your review  
6 of the data that they have reported indicates that  
7 they are losing a lot more money from Medicare than  
8 they are from Medicaid?

9 A. That's correct. And the report explains one  
10 reason why that's the case. Medicare is a much larger  
11 payer for the hospitals in terms of patient population  
12 than is Medicaid. Medicare more like 43 percent.  
13 Medicaid more like 11 or 12 percent of the patient  
14 mix.

15 Q. Based on your experience with healthcare  
16 finance, does that size of Medicare losses raise any  
17 concerns in your mind?

18 A. It does raise a question, which is about the  
19 efficiency of the hospitals. Generally when --  
20 Medicare is viewed as a reasonably accurate payer.  
21 Across the United States all hospitals collectively  
22 lose something like 7 or 8 percent on Medicare, but  
23 it's viewed as a more accurate payer than Medicaid is  
24 in terms of its alignment with the actual cost of  
25 organizations.

1 I noticed that the declarations included  
2 really no information on efficiency of the hospitals,  
3 which means that the claims are about the payment side  
4 of the equation, not so much the cost side of the  
5 equation.

6 Q. And your final conclusion related to the  
7 community benefits requirement. What are your  
8 conclusions and what are their bases in that regard?

9 A. The conclusions are that federal and state  
10 policies expect that tax exempt hospital organizations  
11 should provide community benefit, with community  
12 benefit defined as providing access to care, access to  
13 services, to help enhance public health, to help  
14 advance generalized knowledge, which is where health  
15 professionals education and research comes into the  
16 equation, and also to relieve government burden to  
17 improve health.

18 And I'm quoting text from the IRS Schedule H  
19 instructions where community benefit is defined at a  
20 federal level. It's well understood that providing  
21 charity care at some level of loss, providing Medicaid  
22 services at some level of loss, are important  
23 components of that community benefit.

24 When we look at the IRS form 990, Schedule H,  
25 there's a table that lays out all these categories of

1 community benefit, and these are the first two rows of  
2 that table, charity care and Medicaid services. So  
3 they're clearly important components of the community  
4 benefit that tax exempt hospitals provide.

5 And the expectation is that hospitals will  
6 provide these benefits in return for not paying  
7 property tax, federal income tax, sales tax, and they  
8 also enjoy other benefits like receiving charitable  
9 donations that are deductible to the donor and the  
10 ability to issue tax exempt debt, which is preferred.

11 Increasingly through time the expectations of  
12 organizations to provide these types of benefits have  
13 been increasing, which is why we now have the Schedule  
14 H and additional standards being offered at a federal  
15 level.

16 MS. SMITH: Thank you. I have no further  
17 questions.

18 THE COURT: Thank you, Attorney Smith. Mr.  
19 O'Connell.

20 MR. O'CONNELL: Yes. Thank you.

21 CROSS-EXAMINATION

22 BY MR. O'CONNELL:

23 Q. Good afternoon, Mr. Hearle.

24 A. Good afternoon.

25 Q. Did I understand your conclusion with regard

1 to table 1 is that the plaintiff hospitals are losing  
2 a lot of money on Medicaid?

3 A. That is one of the conclusions, yes.

4 Q. Losing a lot of money, but your point of  
5 differentiation is maybe not as much as represented in  
6 the declarations?

7 A. Yes. If we were to redo this table based on  
8 alternative data sources, the hospitals still would be  
9 shown as losing money but the amount would be  
10 different.

11 Q. Okay. Let's talk about those alternative  
12 data sources for a moment. You know that, for  
13 example, Dartmouth is a health system, right?

14 A. I do.

15 Q. And you were in the courtroom when we talked  
16 about Southern New Hampshire being a system with an  
17 affiliated medical physician practice, correct?

18 A. Yes.

19 Q. Lakes Region, same thing, true?

20 A. That's what I understand, yes.

21 Q. And you were in the courtroom when Exeter  
22 Healthcare talked about its program, which is also an  
23 affiliate of a hospital, correct?

24 A. I believe so, yes.

25 Q. Isn't it true that all of the additional data

1 sources you looked at are hospital only data sources?

2 A. Not entirely correct. The 990 is filed on an  
3 EIN -- by an EIN basis. EIN means employer  
4 identification number. And there are hospital  
5 organizations that include in their EIN non-hospital  
6 activities, like physician groups, like foundations,  
7 like ambulatory care surgery centers. It's probable  
8 that we have some non-hospital operations in some of  
9 the Schedule Hs that I reviewed.

10 Q. Did you ever look to find out if that was the  
11 case?

12 A. I did not go through that level of  
13 assessment.

14 Q. So you don't know as you sit here today  
15 whether Exeter, for example, includes the loss  
16 associated with Exeter Healthcare, its ventilator  
17 program, do you?

18 A. I wouldn't know that.

19 Q. In fact, wouldn't you agree that the better  
20 way to do the analysis that you tried to do for this  
21 Court was to look at the source data from the  
22 declarants?

23 A. I did look at the source data.

24 Q. The source data was the declaration, right?

25 A. Correct.

1           Q. But you're sitting here today and you don't  
2 know what assumptions they made or what data they  
3 used, correct?

4           A. That's because that information was not  
5 disclosed or included in the declarations themselves.

6           Q. Did you ever ask for it from the state? Did  
7 you ever ask to get that source data so that you could  
8 do your analysis?

9           A. I didn't know to ask the state for the  
10 information because the state wasn't cited as the  
11 source of the information in the declarations.

12          Q. Well, let me ask you it this way. If you  
13 were to do this as a consulting undertaking, you would  
14 agree that starting with the source data to determine  
15 what the ground rules were would be a more accurate  
16 way to determine whether there are problems with the  
17 data represented, wouldn't you agree?

18          A. I would want to start with the most accurate  
19 and complete source of information, and one of those  
20 sources is the cost of Medicaid. And there are  
21 different methodologies for cost accounting those  
22 activities. I would want to understand exactly what  
23 methodologies were used to assign costs.

24          Q. So you would like to know how the CFOs who  
25 prepared these declarations relied on their numbers,

1 how they got to their numbers, right?

2 A. I would like to know that, yes.

3 Q. But you went to other data sources that may  
4 not include the same data information to make their  
5 opinions here today. Isn't that true?

6 A. I went to the alternative sources to see if I  
7 could validate the numbers reported by the hospitals  
8 in their declarations and reached my conclusions after  
9 conducting that work.

10 Q. And you never did the level of analysis to  
11 know whether any of the ten plaintiffs' Schedule Hs  
12 that you looked at included their non-hospital  
13 Medicaid revenues or losses, did you?

14 A. I did not figure out if the systems had  
15 activities -- if they filed more than one 990 that  
16 captured other activities outside the ones that I  
17 reviewed.

18 Q. So there could be a pretty simple explanation  
19 for the discrepancies, a non-nefarious explanation,  
20 which is the hospitals just included more data than  
21 you had available to you from these other sources.  
22 Isn't that possible?

23 A. That's possible.

24 Q. By the way, on your Exhibit A you only  
25 reference looking at one of the Schedule Hs, that's

1 for Dartmouth. Is it your testimony you looked at  
2 others?

3 A. I looked at all of the Schedule Hs for all of  
4 the organizations.

5 Q. Is there a reason you didn't disclose that in  
6 your report?

7 A. I believe the "et al" after  
8 Dartmouth-Hitchcock -- the "et al" was meant to  
9 capture all of the other hospitals that I reviewed.

10 Q. Okay. Thank you for that clarification.

11 One of the reports that you relied on was  
12 generated by Steve Norton from the New Hampshire  
13 Center for Public Policies Studies here in New  
14 Hampshire; is that right?

15 A. I believe, yes, it was a cost shift report  
16 that has been issued more than once.

17 Q. And in fact his data, the information he  
18 relies on for that report, is based on the hospital  
19 systems, not just the hospitals. Isn't that true?

20 A. I believe that's true.

21 Q. And it's fair to say, too, is it not, that  
22 hospital systems, at least as they exist in 2012 in  
23 New Hampshire, subsidize unprofitable lines of  
24 business? Isn't that true?

25 A. The report indicates that there is cost

1 shifting from the Medicare program and the Medicaid  
2 program. Except for the critical access hospitals  
3 that have those costs reimbursed by virtue of their  
4 special status, those costs are -- those losses are  
5 shifted to the commercial payers. I believe the  
6 number reported in the 2011 report was something like  
7 \$800 million worth of cost shift.

8 Q. Well, there are a couple different kinds of  
9 cost shift. There's the one you just described, which  
10 is trying to get the commercial payers to pay more  
11 than the cost. That's one, isn't it?

12 A. It is.

13 Q. But within the system itself there's the  
14 ability to take profits generated off of certain kinds  
15 of services with margin and subsidize other services  
16 that have a negative margin. Isn't that true?

17 A. That's very true. There's also a category of  
18 community benefit called subsidized health services,  
19 and basically the IRS would view those types of  
20 cross-subsidized services, like the Exeter unit that  
21 was discussed yesterday, that \$3 million loss, that  
22 could be reported on Schedule H as a community benefit  
23 provided by that organization, if I understand the  
24 details of that program.

25 Q. So that's not a surprising or a new

1 revelation. That's just the way healthcare systems  
2 run.

3 A. It's a basic part of hospital finance. You  
4 take services where you make money, that may be  
5 cardiac care, and you use those profits to fund other  
6 services that the community needs.

7 Q. And so it's also true and well-known, is it  
8 not, Mr. Hearle, that if you take money out of a  
9 system and reduce the margin, the ability of a health  
10 system to subsidize a losing program is diminished?  
11 Isn't that true?

12 A. In a circumstance where a hospital has  
13 reduced reimbursement there are a range of actions  
14 that a hospital can take to address that change in  
15 their circumstances. One of them is to become more  
16 efficient, and many of the statements yesterday  
17 indicated that the hospitals were working to reduce  
18 staff, to do various things to become more efficient.  
19 They have the opportunity to reduce services, such as  
20 those that were discussed, different methodologies for  
21 addressing the reduction. Another is simply to accept  
22 a lower margin and to continue to operate on that  
23 basis.

24 Q. At some point a lower margin, if it's  
25 negative, is not sustainable. Isn't that true?

1           A. I would agree with that.

2           Q. So you heard a lot of testimony over the past  
3 two days about the efforts in efficiency, like  
4 layoffs, like voluntary retirements, like freezing of  
5 executive benefits, those type of things. Is that  
6 what you consider efficiencies?

7           A. Those are the types of things, yes.

8           Q. And at some point you reach the end of what  
9 you can do in order to get the benefit of more  
10 efficiencies. Isn't that also true?

11          A. I believe that's true at some point.

12          Q. At some point you push it too far and you  
13 don't have enough resources to do what you need to do.  
14 Fair statement?

15          A. That's a fair statement.

16          Q. So another option would be the cost shift,  
17 which we talked about, either internally from positive  
18 margin service lines or externally to the private  
19 payers, correct?

20          A. Correct.

21          Q. Now, as part of your undertaking in this  
22 matter have you reviewed any of the contracts that the  
23 ten plaintiff hospitals have here with any of their  
24 commercial insureds?

25          A. I have not.

1 Q. So that's an unknown to you as you sit here  
2 today, right, the ability to cost shift to the private  
3 payers, because you haven't done that analysis?

4 A. I haven't done that analysis specifically in  
5 New Hampshire, but cost shifting is a well-established  
6 phenomenon within hospital finance documented in those  
7 two reports here in New Hampshire, and it's known to  
8 be a way that unprofitable services are paid for, that  
9 impacts on rates are addressed, those types of things.

10 Q. Indeed, New Hampshire has something of a  
11 reputation on its ability to do cost shifting. Isn't  
12 that true?

13 A. I haven't heard of that.

14 Q. Don't you remember Mr. Norton's reference to  
15 the fact that New Hampshire has engaged in effective  
16 cost shifting in ways that other states have only  
17 recently become aware of?

18 A. In my experience cost shifting happens in  
19 every state. Every state -- Medicaid programs  
20 generally pay less than cost in every state, and cost  
21 shifting is a way that hospitals in every state  
22 address those types of concerns.

23 Q. But you would agree with me that that's also  
24 a finite resource that can contribute to the problem.  
25 At some point cost shifting is no longer possible,

1 correct?

2           A. Who knows. Hospitals negotiate with managed  
3 care plans and attempt to maximize their revenue. I  
4 don't know if New Hampshire has reached that point. I  
5 don't know if any hospital has reached that point.  
6 It's a negotiated outcome that is impossible to  
7 predict.

8           And looking at contracts, that would be for a  
9 specific time period. These discussions happen at the  
10 point when you have a new contract up for negotiation.  
11 That's when the rates would make a -- the rate changes  
12 would make a difference.

13          Q. In any event, that wasn't part of your  
14 assignment and you haven't done that work with regard  
15 to the hospitals that are in this case, correct?

16          A. Correct.

17          Q. Now, with regard to services, there is some  
18 point at which the deprivation of funds puts services  
19 at risk. Isn't that true?

20          A. That's true.

21          Q. In fact, when you've been an expert in other  
22 proceedings in other states you've observed that  
23 because of the mission of some hospitals their  
24 financial condition can be much more dire or worse  
25 before they eliminate services because care is central

1 to their mission. Isn't that an observation you've  
2 made in other cases?

3 A. I believe so, yes.

4 Q. So it's a fair statement that the deprivation  
5 of funds alone is not the only sign of distress --  
6 strike that.

7 The deprivation of funds can be causing  
8 significant harm to a health system long before they  
9 reach the point of closure. Isn't that true?

10 A. That's true if that organization has not  
11 implemented efficiencies or made other changes to  
12 manage through those problems; that's correct.

13 Q. Now, the plaintiffs contend in this case that  
14 by changes in UPL and DSH \$130 million in payments on  
15 a year over year basis have been taken from them that  
16 would otherwise be used to supplement their Medicaid  
17 services. You understand that, right?

18 A. I understand that the reduction on this chart  
19 to revenue would be 130 million. Whether or not those  
20 are actually used specifically for Medicaid services  
21 is another question. It's just one other part of the  
22 revenue base of a health system used for whatever  
23 purposes. It's not restricted to be used for Medicaid  
24 or any specific purpose.

25 Q. Okay. But a dollar is a dollar.

1           THE COURT: But it's tied to Medicaid, right?

2           Q. It starts from a Medicaid based service,  
3 isn't that the case? UPL starts from a Medicaid based  
4 service?

5           A. It's generated by Medicaid utilization,  
6 right, and to the extent to which the Medicaid  
7 payments are lower than the Medicare rates for a  
8 similar service.

9           Q. It's basically a gap filler. Isn't that  
10 right?

11          A. It is a mechanism to provide revenue to  
12 hospitals up to the amount that Medicare would pay for  
13 similar services. The difference between what -- I  
14 mean, the maximum payment under a UPL mechanism would  
15 be the base Medicaid payment plus an amount that could  
16 bring it up to what Medicare would pay for a similar  
17 service.

18          THE COURT: Maybe it's a little late for this  
19 question, but is it a rate?

20          Q. Isn't it true that UPL is based on the  
21 differential, the rate that is paid through Medicaid  
22 up to the rates that would get paid by Medicare? It's  
23 a rate gap filler. Isn't that the case?

24          A. I would think of it as a bucket of money that  
25 is calculated based on the average Medicaid rate and

1 the average Medicare rate. It's not a --

2 THE COURT: Let me ask you this. If I said  
3 it's a Medicaid rate; is it or is it not?

4 THE WITNESS: It's a Medicaid resource. It's  
5 a Medicaid revenue.

6 THE COURT: It's a Medicaid apple. It's a  
7 Medicaid orange. Whatever. Is it a Medicaid rate?

8 THE WITNESS: I would say, no, it's not a  
9 Medicaid rate.

10 Q. And of course the state desperately does not  
11 want it to be a rate in this case because then they  
12 have a real problem with the notice they provided.  
13 Isn't that true?

14 A. I would not know that.

15 Q. Okay. At the end of the day -- let's be  
16 clear about the UPL. It starts with a Medicaid  
17 service to someone who comes in and is provided that  
18 service, and the hospital or the system gets some  
19 portion of reimbursement for that service, correct?

20 A. Correct.

21 Q. Okay. Now, the hospital takes the  
22 difference -- or they report that amount that they've  
23 gotten for the Medicaid service, they put it in their  
24 cost accounting reports, and it goes into some system,  
25 and there's a delta calculated between what's being

1 reimbursed for that Medicaid service and what Medicare  
2 would pay. Isn't that right?

3 A. There's a what if analysis on the total  
4 bucket of activity. What if these services had been  
5 paid for at Medicare rates? What would the dollar  
6 value of that delta be in total? That's the --

7 Q. But you're right. Medicare is the higher  
8 payer in this transaction. Isn't that the case?

9 A. It is. And the fact that upper payment limit  
10 dollars were available shows that Medicaid rates have  
11 been lower than Medicare rates. That's true.

12 Q. And the Medicare program, that's all set by  
13 the federal government, correct?

14 A. It is.

15 Q. And the Medicaid reimbursement, the DRG,  
16 that's set at the state level, correct?

17 A. It is.

18 Q. Just to get back to the point, I don't know  
19 if we agree on this or not, and I just want to be  
20 clear if we don't. After that service is provided  
21 there's a delta that UPL allows the state to use to  
22 make up that rate differential between Medicaid and  
23 Medicare, true?

24 A. I would say it's a dollar differential  
25 between the value of the services at Medicaid rates

1 and the value of the services at Medicare rates.

2 Q. It's reimbursement for services, though.

3 Isn't that the case?

4 A. It is.

5 Q. Okay. No one can just say give me UPL if  
6 they haven't provided a Medicaid service that they got  
7 reimbursed for. Isn't that true?

8 A. Correct.

9 Q. As opposed to DSH, which may be based on  
10 uncompensated care, which is different. Isn't that  
11 true?

12 A. It is.

13 Q. Okay. So Medicaid absolutely starts with a  
14 Medicaid service. And if anyone tries to get a UPL  
15 when they haven't provided a Medicaid service, they  
16 can't get it, true?

17 A. True. It's designed to supplement Medicaid  
18 payments.

19 Q. Now, the second conclusion of your report has  
20 to do with the UPL being a one-time event roughly,  
21 true?

22 A. True.

23 Q. That's your second conclusion. And the sole  
24 basis according to your report for that conclusion is  
25 a discussion you had with Kathleen Dunn. Isn't that

1 right?

2 A. That's correct.

3 Q. Now, you were in court when Mr. MacDonald was  
4 showing the state plan amendments, Exhibit 1 and  
5 Exhibit 2, to Ms. Dunn, weren't you?

6 A. I was.

7 Q. Now, you hadn't seen those before today, had  
8 you?

9 A. I had not. I saw them yesterday.

10 Q. You didn't see them before you finalized your  
11 report, I guess. Isn't that true?

12 A. That's correct.

13 Q. By the way, your report is dated January 4th,  
14 right?

15 A. Yes.

16 Q. Is that when you finished it?

17 A. Yeah, it is.

18 Q. And up to January 4th you hadn't looked at  
19 the state plan amendments to verify what you were told  
20 by Ms. Dunn about upper payment limit being a one-time  
21 deal?

22 A. Her explanation was that the UPL program was  
23 proposed by the hospital association who had a  
24 consultant, Health Management Associates, propose the  
25 idea that the ARRA program, the American Recovery and

1 Reinvestment Act, provided an opportunity to take  
2 advantage of a higher matching rate which was part of  
3 a stimulus package to help the state with economic  
4 recovery. And the idea was to continue that UPL  
5 program as long as that higher matching rate was  
6 available, and that struck me as a logical comment on  
7 her part.

8 Q. And that's where your inquiry ended until  
9 yesterday when you saw the state plan amendment that  
10 had some different language. Isn't that true?

11 A. I didn't see anything inconsistent in the  
12 state plan amendments -- anything inconsistent with  
13 what Ms. Dunn communicated to me.

14 Q. Sir, you don't think it was inconsistent for  
15 the state plan to be filed that said that there would  
16 be an annual Medicaid payment?

17 A. No.

18 Q. Do you think annual means only one year?

19 A. The state hoped to continue the UPL payments  
20 as long as the ARRA funds, the stimulus funds, were  
21 available that may have crossed fiscal periods, which  
22 may have meant more than one year.

23 When it became clear that the ARRA funds were  
24 going to terminate, the state put together a new state  
25 plan amendment that clarified that this was an annual

1 one-time resource.

2 Q. Well, I understand that that's what Ms. Dunn  
3 told you, but can you show me where that explanation  
4 shows up in the state plan amendment, that anybody who  
5 wanted to know what the rules of the game were would  
6 find out that it was a one year commitment? Can you  
7 point that out, or is it only what Ms. Dunn said to  
8 you?

9 A. Well, it's what Ms. Dunn said to me, and it  
10 states here in the state plan amendment that it's an  
11 annual payment adjustment.

12 Q. Annual. And then it goes on to say that --  
13 sorry, my glasses are at home: This payment  
14 adjustment is made in addition to all other categories  
15 of inpatient services reimbursement otherwise made  
16 under the provisions of Section 4.19 A, items 1  
17 through 9. This annual calendar year adjustment  
18 payment will be made in the final calendar quarter of  
19 each year. Each year.

20 A. I believe it goes on -- the amendment goes on  
21 to say for -- it's time limited. There's something --  
22 I can't remember the exact language but --

23 Q. Let me put it in front of you so you can see  
24 the language that you think is time limiting.

25 A. Until such time as it may be amended under

1 the state plan. That's the language. So it was then  
2 amended by subsequent state plan amendments.

3 Q. There was an amendment that turned out it  
4 made it one year, but the plan itself gave the state  
5 the option to make plans in each year, did it not?

6 In fact, put it this way -- let me ask  
7 another question, Mr. Hearle. If the state decided to  
8 make a UPL payment in 2012, they're covered by this  
9 SPA that I've just been showing you. Isn't that the  
10 case?

11 A. That SPA has been superseded by a second  
12 state plan amendment that would make that not doable.

13 Q. Okay. So assume that second one wasn't in  
14 there. It strikes out all of that annual language and  
15 the stuff. The one I'm showing you right now, if this  
16 were in place today, if this were the state plan the  
17 state would be able to make an upper payment limit and  
18 there would be no need for an amendment. Isn't that  
19 true?

20 A. If this were the state plan language in  
21 effect, if it hadn't been superseded by a second plan  
22 amendment, then yes, they would have had the ability  
23 to continue making those payments.

24 Q. You did some triangulation of data from the  
25 hospitals on Medicare cost reports. Sir, you don't

1 know, like you didn't know with the Schedule Hs,  
2 whether the non-hospital affiliated numbers were  
3 included in those Medicare cost reports, do you?

4 A. I know that they were not because the cost  
5 reports are filed only by the hospital operations, the  
6 provider numbers for each hospital.

7 Q. So there's an easy explanation. We've got  
8 hospital systems here for the most part that are  
9 plaintiffs, and you know just by definition that the  
10 numbers that you are trying to triangulate don't have  
11 their non-hospital affiliate numbers in it, true?

12 A. That's true. I'm comparing one set of  
13 numbers that are specifically mentioned in the  
14 declarations, the hospital outpatient cost numbers,  
15 with other hospital cost report numbers that were  
16 filed with the state. So it is apples and apples  
17 based on the way it was described.

18 Q. When do hospitals file their cost reports, on  
19 their own fiscal year or on a set schedule?

20 A. I believe it's on their own fiscal year.  
21 Within 90 days of the end of that year. And then  
22 there's a process of having them reviewed and audited  
23 by intermediaries.

24 Q. Going back to UPL for a second, you suggested  
25 that the hospitals -- some of the tables you were

1 looking at -- I think you might have one in front of  
2 you. I don't mean to look over your shoulder.

3 MS. O'CONNELL: Would you pull Exhibit 79 up?

4 Q. Would you look at that for a minute?

5 A. Yes.

6 Q. You suggested that this table improperly  
7 carries some UPL references for 12 and 13. Do you see  
8 that?

9 A. I do.

10 Q. All right. Now, you had some criticisms in  
11 your report of last Friday, some of which are  
12 addressed by Exhibit 79. Isn't that true?

13 A. That's true. The UPL number in 2011, which  
14 was a negative number in the original declarations,  
15 then became a zero in the second -- in the  
16 supplementary declarations is not now positive in this  
17 exhibit.

18 Q. So that is reflecting in this example an  
19 upper payment limit payment in 2011 to Lakes Region  
20 General, and that's offsetting the other expenses  
21 listed above, true?

22 A. That's the way I would think about it.

23 Q. Okay. That's consistent with your analysis.  
24 That's how you would recommend somebody carry that if  
25 they're going to represent that number, true?

1           A. If I were reviewing a summary of rate  
2 reductions and included upper payment limit, that  
3 resource in that table, then yes, I would put them all  
4 together in this way.

5           Q. Okay. Now, your quarrel is that because of  
6 your understanding that it was a one year situation  
7 and that the state had no obligations under a state  
8 plan to do an amendment, or any of those types of  
9 things, it shouldn't be carried in 12 and 13; is that  
10 right?

11          A. It shouldn't be carried as a negative number.  
12 In my career I've done hundreds of hospital financial  
13 models for feasibility studies for different types of  
14 assessments. And if I were modeling out the net  
15 impact of these changes on an organization what I  
16 would do is have the upper payment limit revenue come  
17 in as a positive in 2011 and then come in as a zero in  
18 2012 and 2013.

19          Q. Well, okay. What if you're a hospital  
20 plaintiff in this case and you read the state plan  
21 amendment that said UPL is going to get an annual  
22 payment, the language I just showed you, wouldn't it  
23 be reasonable and prudent to include it in your  
24 assessment until there's a state plan amendment filed  
25 to remove it, or should we rely on, you know, the

1 comments of the director informally to a witness like  
2 you?

3 A. Can you restate that, please?

4 Q. Sure. If you're a hospital plaintiff in this  
5 case, isn't it reasonable, looking at a state plan  
6 amendment that says annual UPL payments will be made  
7 until such time as they are amended and taken out, I'm  
8 paraphrasing, isn't it reasonable to model that in the  
9 financial impacts?

10 A. The way I would then model it is to have the  
11 4.1 million in as a revenue in each of these three  
12 years. And if I thought it was going away, then I  
13 would have the number backed out. So I would have the  
14 4.1 positive, 4.1 positive, 4.1 positive, and then  
15 show the negative 4.1, in the event it would be lost,  
16 so the net effect would be zero. That's how I would  
17 describe it in the table.

18 Q. But that assumes a payment in the reduction,  
19 not the loss of a payment.

20 THE COURT: That's what the state did in  
21 reverse with the tax.

22 MR. O'CONNELL: I'll move on.

23 THE COURT: His point is, if you're not going  
24 to get it, you don't count it as having gotten it and  
25 then offset it out for not getting it. You just say

1 you didn't get it, right?

2 THE WITNESS: Right.

3 THE COURT: But this isn't to show what your  
4 financial projection is. This is to show an impact  
5 that you didn't expect to have.

6 MR. O'CONNELL: Just impact. Impact.

7 Q. You didn't understand this to be a damage  
8 claim, did you, Mr. Hearle?

9 A. I understood this to be an impact. So as I  
10 project out -- if I were CFO and I projected out the  
11 impact of these on my revenue stream, I would say I  
12 had a positive event in 2011 and a zero event in 2012  
13 and 13.

14 Q. That's how you would do it?

15 A. That's how I would do it.

16 Q. Okay. You talked about the wherewithal of  
17 New Hampshire hospitals because of positive margin,  
18 and you had a number and a table that Ms. Smith asked  
19 you about. Do you remember that, generally?

20 A. I'm sorry?

21 Q. You were asked questions about hospital  
22 margins by Ms. Smith.

23 A. I was.

24 Q. That's another example, is it not, where you  
25 looked just at the data of hospitals and not the

1 health system, true?

2 A. I looked at both. The audited financial  
3 statements are for the systems. That includes all the  
4 activities included in those audited financials.

5 Q. And that's table 8?

6 A. It is.

7 Q. Okay. And that's half the margin from what  
8 you report in table 7?

9 A. For 2009, yes. That's correct.

10 Q. Would you tell me, sir -- you've done a lot  
11 of work on assessment of reimbursement rates to comply  
12 with Medicaid. Isn't that true?

13 A. I have assessed Medicaid payment issues in  
14 several states, yes.

15 Q. You've been an expert retained to do that and  
16 provide advice?

17 A. I've been an advisor to state hospital  
18 associations on that topic, yes. Not in litigation.

19 Q. You did an assessment for Oregon?

20 A. Correct.

21 Q. You did an assessment for Massachusetts?

22 A. Yes. For the Governor's office.

23 Q. In connection with those assessments you  
24 didn't include any analysis of the profitability of  
25 hospitals or health systems to assess the adequacy of

1 Medicaid funding. Isn't that true?

2 A. I believe I did project out the impact of  
3 Medicaid payment on the hospitals' margins in those  
4 states. It's been several years since I did those  
5 studies.

6 Q. Fair enough. If we need to look at them, we  
7 will, but let me ask you this. The point of your  
8 analysis wasn't to suggest that hospitals could pay  
9 and subsidize the Medicaid. You were simply modeling  
10 the impacts over time of different types of  
11 reimbursements. Isn't that fair to say?

12 A. Correct.

13 Q. So this is a different exercise than you did  
14 for Massachusetts and Oregon, stating a proposition  
15 that, well, hospitals have a positive margin and they  
16 can afford to subsidize Medicaid. It's different here  
17 than there; isn't that right?

18 A. I'm not sure how.

19 Q. Well, your point of view is that hospitals  
20 are in a better position to absorb Medicaid losses  
21 than other states.

22 A. The point of view is that historically the  
23 hospitals have been more profitable in New Hampshire  
24 than hospitals in other states, and that is after many  
25 of these rate reductions already were implemented.

1           Q. Well, my question is on 30(a), that you're  
2 familiar with from all this work that you've done.  
3 Where does 30(a) allow this Court, or CMS, or anybody  
4 who is going to look at the adequacy of rates, to look  
5 at the financial margin of the provider?

6           A. I'm actually not familiar with --

7           MS. SMITH: I'm going to object. That calls  
8 for a legal conclusion. He's not here as a legal  
9 expert.

10          THE COURT: I agree. Sustained.

11          Q. I will withdraw it and ask: Are you  
12 familiar, sir, with -- in any circumstance in which  
13 you've provided counseling, Oregon, Massachusetts,  
14 where the standard that you're trying to meet was the  
15 profitability of a hospital to absorb more Medicaid  
16 losses?

17          A. I'm familiar with assessing the impact of  
18 Medicaid payment on hospital margins. I'm also  
19 familiar that state Medicaid agencies do consider the  
20 financial performance of providers when they consider  
21 rate issues.

22          Q. You've said before that the point of the  
23 Medicaid program in evaluating the equity and  
24 performance of a payment system, such as Medicaid,  
25 that the payment rates are high enough to encourage

1 payment participation by efficient providers, true?

2 A. Yes, I believe I said that.

3 Q. Ensure access to beneficiaries/enrollees in  
4 all markets and to the general population in local  
5 markets, true?

6 A. If you're reading from one of my reports that  
7 probably is ten years old.

8 Q. Sure.

9 A. I probably did say those things.

10 Q. One second.

11 A. Which report is it?

12 Q. Oregon. February 26, 2003. Is this your  
13 report, sir?

14 A. It's a report prepared by the Lewin Group. I  
15 was the lead analyst working on the report, yes.

16 Q. And you remarked in that context that the  
17 payment system should do what I was just describing,  
18 among other things. Let me show you the language just  
19 so you can verify it.

20 THE COURT: Is this all heading to his  
21 opinion on whether or not profitability should be  
22 considered?

23 MR. O'CONNELL: Yes. Okay. I'll move on.

24 THE COURT: Do you have much more to go?

25 MR. O'CONNELL: No.

1           THE COURT: Because I assume you have a plane  
2 to catch, Mr. Hearle.

3           THE WITNESS: I do, yes.

4           THE COURT: The court reporter has been kind  
5 of going along for more than two hours, which is  
6 probably against the union.

7           MR. O'CONNELL: I understand, your Honor.

8           Q. The last point, charitable benefits. These  
9 ten hospitals provided, based on the state's own  
10 numbers, 177 million in uncompensated care in fiscal  
11 year 2012; is that right?

12          A. That's what the exhibit shows, yes.

13          Q. Do you have any reason to doubt that?

14          A. No.

15          Q. That's a lot of community benefit, isn't it?

16          A. Typically to figure out if it's a lot you  
17 denominate it by the total expenses of the  
18 organization. So it's a percent of the expense, what  
19 percent of the budget is being used for those  
20 purposes, and that's not portrayed here.

21          Q. So you don't know? You don't have an opinion  
22 on that?

23          A. I don't have the denominators to say if  
24 that's a lot compared to other standards that I'm  
25 aware of.

1           MR. O'CONNELL: One second. I have no  
2 further questions, your Honor. Thank you.

3           THE COURT: Any redirect?

4           MS. SMITH: Just a few. First I want to ask  
5 Attorney O'Connell if you will agree to strike the ID  
6 on Mr. Hearle's report.

7           MR. O'CONNELL: Oh, I will not. It's got a  
8 lot of hearsay. I think he's testified to the tables,  
9 and there's a lot of things in there that are  
10 objectionable.

11                           REDIRECT EXAMINATION

12 BY MS. SMITH:

13         Q. Just to get back to a couple of the questions  
14 that Attorney O'Connell asked you. He asked you a lot  
15 of questions about why didn't you review source data  
16 from the hospital.

17           Did you understand that at this point we were  
18 in a preliminary injunction stage and we have not  
19 conducted discovery, therefore the state has just had  
20 no opportunity to ask for that data yet?

21         A. I understand that, yes.

22         Q. And is that -- strike that. In regards to  
23 these total numbers that Attorney O'Connell was  
24 talking about the affect of the 2011 changes, you  
25 understand that DSH includes not just the Medicaid

1 losses but also uninsured?

2 A. I do.

3 Q. And if you could, from the white notebooks  
4 behind you and what's being put up on the screen, look  
5 at Exhibit 120?

6 A. Which binder might it be in?

7 Q. It's probably either 2 or binder 3. It's  
8 binder No. 2.

9 A. There's no 120 in here.

10 Q. I have it. Here. Let me just hand you a  
11 paper copy of it.

12 A. Thank you.

13 Q. Were you provided a complete set of the  
14 exhibits that had been attached by the defendant to  
15 the preliminary injunction motion?

16 A. I'm not sure if I was.

17 Q. Can you just look at that and tell me if you  
18 recall seeing it before?

19 A. I do recall seeing this, yes.

20 Q. Okay. So this is one of the documents that  
21 you had reviewed?

22 A. Yes.

23 Q. And you remember that you said that Ms. Dunn  
24 had told you that the UPL was a one-time payment that  
25 had been suggested by the hospital association's

1 consultant?

2 A. That's what I recall, yes.

3 Q. If you can look at that, is that the hospital  
4 association's consultant that she was telling you  
5 about?

6 A. Yes. Health Management Associates.

7 Q. And in that does the hospital consultant  
8 recognize that this UPL payment is a one-time thing?

9 A. The paper speaks to the enhanced Medicaid  
10 matching rate on page 2. It says: While the enhanced  
11 Medicaid matching rate provided through the stimulus  
12 bill is set to expire December 31, 2010, the House  
13 healthcare reform bill included an extension. If  
14 that's included, so and so.

15 Q. And then below that does it say: But this is  
16 a one-time event?

17 A. Yes. I do see below that it speaks to it  
18 being a one-time solution: It is important to note  
19 that all of the approaches described above represent  
20 one-time solutions for the funding shortfall.

21 Q. So in the question that Attorney O'Connell  
22 asked you about, if the hospital CEO could reasonably  
23 have expected UPL, do you think it was reasonable to  
24 expect UPL to continue when their own consultant had  
25 suggested it as a one-time solution?

1           A. If the CEO had read this report, then I would  
2 assume not.

3           MS. SMITH: I don't have any further  
4 questions.

5           THE COURT: All right. Thank you.

6           MR. O'CONNELL: I do.

7           THE COURT: All right.

8           MR. O'CONNELL: Thank you, your Honor.

9                               RE CROSS-EXAMINATION

10          BY MR. O'CONNELL:

11          Q. Would you keep that document in front of you,  
12 sir? This document where it says it's a one-time  
13 solution is directly under a heading that says  
14 Enhanced Medicaid Matching Rate. Do you see that?

15          A. I do.

16          Q. That's not UPL. That was special to the  
17 stimulus plan in that year. Isn't that true?

18          A. It is. But it provided the opportunity to  
19 engage in the one-time solution.

20          Q. There's nothing that stopped the state of New  
21 Hampshire from paying UPL this year except an  
22 appropriation for it. Isn't that true?

23          A. I don't know the answer to that.

24          MR. O'CONNELL: Thank you. Nothing further,  
25 your Honor.

1           THE COURT: Thank you, sir. You can step  
2 down. You're excused. And why don't we take a ten  
3 minute break.

4           (RECESS)

5           THE COURT: All right. Where were we, Ms.  
6 Smith?

7           MS. SMITH: Attorney MacDonald had finished  
8 his testimony with Ms. Dunn, and I was going to start  
9 mine.

10          THE COURT: All right. I assume you want to  
11 go Friday? I assume you wish to resume Friday?

12          MR. MACDONALD: Yes.

13          MS. SMITH: Yes.

14          THE COURT: 9:00 o'clock?

15          MS. SMITH: Yes.

16          THE COURT: Just a few hours?

17          MR. O'CONNELL: Yes.

18          MS. SMITH: We're assuming we have all day on  
19 Friday?

20          THE COURT: Do you really need it? Well,  
21 I'll see. We'll see.

22          MS. SMITH: We still have a number of  
23 witnesses that haven't been called.

24          THE COURT: I'll at least give you all the  
25 time that I've used up myself. Let's do it that way.

1 CROSS-EXAMINATION OF KATHLEEN DUNN

2 BY MS. SMITH:

3 Q. Ms. Dunn, you've been asked a lot of  
4 questions in the last couple of days about various  
5 state plan amendments that have been submitted. And  
6 let me bring up to you to show you so that we can be  
7 looking at the same page, it's Exhibit 173, and the  
8 defendant's exhibit which is the same one the  
9 plaintiffs have marked as well.

10 Looking at the front of this, this is the  
11 composite section of the state plan that is 4.19 B,  
12 and that deals with outpatient services, correct?

13 A. Yes, it does.

14 Q. Okay. When you submit a state plan, is there  
15 some lag time usually before it's approved by CMS?

16 A. Yes, there is. CMS has 90 days to review the  
17 submittal, and at that time they have to either  
18 approve the state plan amendment or send a request for  
19 additional information back to the state.

20 Q. And then what happens in that process after  
21 they send the request for additional information back  
22 to the state?

23 A. CMS starts a 90-day clock, and it requires  
24 the state to provide answers to the questions. If the  
25 request for additional information -- during that

1 time -- I'm sorry -- during that time you answer  
2 questions from CMS even by phone, et cetera, e-mails  
3 they'll send us, and if CMS believes that we're going  
4 to go past the 90-day clock, they will pull the state  
5 plan amendment what they call off the clock. And at  
6 that point they want to work with the state in order  
7 to resolve whatever issues need to be resolved. It  
8 goes back on the clock and gets approved.

9 Q. So what is the ability -- can the state  
10 implement a proposed state plan before CMS approves  
11 it?

12 A. Yes, except in one instance. And that is if  
13 you're going to implement Medicaid managed care, you  
14 have to have your state plan approved before you can  
15 actually roll the program out. Otherwise your state  
16 plan amendment has to be filed by the last day of the  
17 quarter which you wanted the state plan to be  
18 effective.

19 Q. And in regards to some of these state plans  
20 that we see in Exhibit 173, and I'm going to take you  
21 to I believe it's page 12 of 57 in that document as  
22 just an example, how long did it take to get that  
23 state plan approved through CMS?

24 A. This was submitted in 2007. It's 07-010 at  
25 the bottom. It was finally approved by CMS on June

1 24th of 2010.

2 Q. So it took over three years for that one?

3 A. It did.

4 Q. And how does -- let me just ask regarding a  
5 specific state plan. We looked before at state plan  
6 06-008 and we were on page 1, and this is page 6 of 57  
7 in Exhibit 173. Is that state plan still pending with  
8 CMS?

9 A. Yes, it is.

10 Q. And I think you were asked questions either  
11 earlier today or yesterday about when this page was  
12 first submitted and you were shown what has been  
13 marked as --

14 MR. MACDONALD: Plaintiff's 92.

15 MS. SMITH: Pardon?

16 MR. MACDONALD: Plaintiff's 92. I'm sorry.  
17 96.

18 MS. SMITH: It's Plaintiff's Exhibit 96.

19 Q. Do you remember looking at that earlier  
20 today?

21 A. Yes, I do.

22 Q. I believe that Mr. MacDonald told you that  
23 the first time -- that when this page 1 that we're  
24 looking at in Exhibit 173 was submitted in response to  
25 request for admissions -- not request for admissions,

1 I'm sorry -- the RAIs, the request for additional  
2 information, this was submitted by the department to  
3 CMS in a transmittal that's in that document on  
4 November 20, 2008, correct?

5 A. Yes. This was responding to the request for  
6 additional information on that 06-008.

7 Q. And so this page had been submitted to CMS --  
8 had this page been submitted to CMS before the  
9 November 21, 2008, fiscal committee meeting?

10 A. Yes.

11 Q. And what is your understanding as to whether  
12 or not you could operate under the language that was  
13 in paragraph 1 in this page on November 21, 2008?

14 A. It was my understanding that -- because we  
15 had a pending state plan amendment, that until it is  
16 disapproved by CMS that we were able to operate  
17 underneath it.

18 Q. And was this same language that was in  
19 paragraph 1 submitted as part of subsequent SPAs that  
20 also affected that page?

21 A. Yes.

22 Q. And can you look through this and tell me if  
23 that language is still in the page 1 that is currently  
24 pending for review before CMS?

25 THE COURT: Which language is this related

1 to?

2 MS. SMITH: I'm looking specifically at the  
3 first paragraph of page 1 and 4.19 B, first paragraph  
4 of paragraph 1.

5 THE COURT: Is it here? No, it's not.

6 MR. O'CONNELL: We have a technology issue,  
7 your Honor. We are running it currently. Oh, you've  
8 got it, okay. No? 96?

9 MS. SMITH: We're on Exhibit 173.

10 MR. O'CONNELL: I'm sorry. I think we solved  
11 it.

12 THE COURT: Okay. Thanks.

13 A. On the page of the exhibit at the top  
14 right-hand corner it's labeled page 2 of 57. It is  
15 transmittal number 10-014, a state plan amendment  
16 submitted in 2010, and the -- if you look at number 1  
17 where it says Outpatient Hospital Services, the first  
18 paragraph looks to be exactly the same from the  
19 06-008.

20 Q. And going back to the prior SPA that we were  
21 talking about that you may be withdrawing that was  
22 08-017, that also contained the same language in the  
23 first paragraph of paragraph 1, correct?

24 A. It did.

25 Q. And there's actually been -- has there been a

1 subsequent page of this filed more recently than  
2 what's in here?

3 A. Yes. We had to file a state plan amendment  
4 to be able to meet the changes in the DSH program so  
5 that we could make payments in December to the  
6 critical access hospitals. So the prefix starts with  
7 an 11.

8 Q. It's in the notebooks behind you I believe as  
9 Exhibit 194 or 195. Actually, it's 195.

10 A. Yes.

11 Q. So that same language that we saw starting  
12 back in 06-008 in paragraph 1 that was discussed as  
13 being a clarification of the existing methodology has  
14 continued in each of the SPAs that have been submitted  
15 down to this one, which is 11-007?

16 A. Correct.

17 Q. And what is the methodology described in that  
18 paragraph as far as setting outpatient rates?

19 A. The current -- the 11-007 says that an  
20 interim payment shall be made based on percent of  
21 charges. Final payment is made in accordance with the  
22 percent of costs. An audit of each hospital's actual  
23 costs eligible for reimbursement shall be performed by  
24 the fiscal intermediary in accordance with federal  
25 Medicare requirements. The department shall determine

1 the percent of actual costs to be reimbursed. And  
2 then payments made to the hospital in the previous  
3 year shall be cost settled using the percent  
4 determined by the department and the actual cost data  
5 audited by the fiscal intermediary.

6 Q. What does that language provide as far as the  
7 department's ability to adjust the percentage applied  
8 to cost reimbursement if your budget is insufficient  
9 to cover the services?

10 A. I believe the language provides that the  
11 department will determine what the percent of actual  
12 costs are to be paid -- excuse me -- to be reimbursed.  
13 And so ultimately the department's determination is  
14 based upon the funding made available by the  
15 legislature.

16 Q. At what page -- what version of this page,  
17 which has been referred to as the reimbursement page,  
18 do you believe you had the right to operate under on  
19 November 21, 2008?

20 A. I believe that I had the ability to operate  
21 under the very first one, the 06-008.

22 MS. SMITH: I could probably start another  
23 line of questioning, your Honor. I can do that, or we  
24 can break till Friday.

25 THE COURT: Well, we have to be out before

1 5:00 anyway. All right. Why don't we do that. Why  
2 don't we just take a few minutes -- you can step down,  
3 if you would like, Ms. Dunn, I appreciate it -- since  
4 we have a few minutes.

5 Maybe this already exists somewhere in an  
6 exhibit, but I'm starting to get lost about the  
7 nefarious rates settled.

8 Outpatient radiology, that's a rate  
9 reduction? That's part of your claim?

10 MR. MACDONALD: It's a rate reduction. I  
11 believe --

12 THE COURT: Good. If you don't know, then I  
13 feel better about not knowing.

14 MR. MACDONALD: It is a rate reduction, yes.

15 THE COURT: That's part of your claim?

16 MR. MACDONALD: It is part of the claim, but  
17 there was testimony -- I was just going to say there  
18 was testimony you heard today from Ms. Dunn which is  
19 that they are no longer enforcing that rate reduction  
20 and they're going to pay -- refer back to a cost  
21 schedule. I'm just trying to make --

22 MS. SMITH: And recalculate all of the  
23 payments before that.

24 THE COURT: So that's just an example of --  
25 you're just throwing that in as an example of a

1 similar violation.

2 MR. MACDONALD: Your Honor, we pled that in  
3 our complaint filed in July.

4 THE COURT: They changed their mind.

5 MR. MACDONALD: They changed their mind in  
6 January.

7 THE COURT: A revenue code 5 payment?

8 MR. MACDONALD: Yes.

9 THE COURT: That's a rate reduction that you  
10 claim is improper.

11 MR. MACDONALD: That's correct.

12 THE COURT: Improperly noticed. Let's just  
13 use this for my benefit. Let's just think 13(A).  
14 Outpatient cost settlement, a claim?

15 MR. MACDONALD: Rate reduction.

16 THE COURT: Rate reduction claim?

17 MR. MACDONALD: Yes.

18 THE COURT: Inpatient UPL payment?

19 MR. MACDONALD: Yes.

20 THE COURT: You claim that's a rate  
21 reduction?

22 MR. MACDONALD: Yes.

23 THE COURT: So outpatient UPL payment, the  
24 same thing?

25 MR. MACDONALD: Yes.

1           THE COURT: DSH payment, reduction,  
2 eliminate, you claim that's a rate reduction?

3           MR. MACDONALD: It's a change in the  
4 methodology of the state plan. We cannot claim it's  
5 part of the rates.

6           THE COURT: So how does it come under your  
7 claim? You claim it's a failure to give adequate  
8 notice and opportunity to make comment on a change to  
9 the state plan, 13(A)?

10          MR. MACDONALD: Yeah.

11          THE COURT: And the catastrophic payments?

12          MR. MACDONALD: That's a rate reduction.  
13 Yes, your Honor.

14          THE COURT: All right. I'm getting the  
15 impression that there is some -- your position is that  
16 some of these things were noticed?

17          MS. SMITH: Correct.

18          THE COURT: After the fact kind of?

19          MS. SMITH: Well --

20          THE COURT: You know, I've been looking at  
21 Judge Tauro's case out of Massachusetts and the Hood  
22 case out of the Fifth Circuit, and I'm looking at  
23 those models as sort of analytical models and they're  
24 pretty clear.

25          The first question obviously is: Do you have

1 to give public notice? Is it a rate reduction or is  
2 it a methodology change? Do you? If you did, what  
3 did you do? And are you claiming that some of these  
4 changes, amendments -- state plan amendments were  
5 noticed and by publication of notices in newspapers?

6 MS. SMITH: Yes.

7 THE COURT: Some of these that I've just  
8 outlined?

9 MS. SMITH: Yes.

10 THE COURT: Okay. After the fact? Before  
11 the fact?

12 MS. SMITH: Before the fact.

13 THE COURT: Okay. At some point I think I'm  
14 going to want a compilation of, here are my claims.  
15 These are the improper rate reductions. This is what  
16 we say forms the basis of our claim that they're  
17 unlawful.

18 And I would like the state to give me a  
19 column that says, this is our claim as to why they  
20 were properly noticed or didn't have to be noticed or  
21 whatever. And then I get the impression that your  
22 claims are sort of -- I'm not sure what they are. You  
23 seem to have some claims out there -- well, I lost the  
24 thought. Well, you can't help me.

25 MR. MACDONALD: May I, your Honor? Just on

1 that list we would also include the outpatient rate  
2 reduction.

3 THE COURT: The outpatient rate reduction,  
4 right.

5 MR. MACDONALD: And the inpatient rate  
6 reduction. So the --

7 THE COURT: Oh, I'm sorry. Right, right,  
8 right. Sure. Yes. And then that's different because  
9 that's -- one is apparently subject to an unchallenged  
10 state plan amendment, the inpatient, as I recall, and  
11 the question is -- that's what I was thinking. The  
12 question is what does it mean, right?

13 MR. MACDONALD: That state plan amendment,  
14 whether it was sufficient.

15 THE COURT: Well, in my mind first it's what  
16 does it mean, and secondly -- that's what I was  
17 thinking. You have a claim that -- I gather for the  
18 inpatient you've got a claim that either it was  
19 changed, in which case it wasn't properly noticed, or  
20 if you take the state at its word, they just clarified  
21 it, they didn't change anything, in which case they  
22 didn't apply it properly.

23 MR. MACDONALD: That's exactly right for  
24 outpatient.

25 THE COURT: Outpatient. Okay. I'm sorry.

1 Inpatient is, what does it mean when it says adjust  
2 minus state budget neutrality factor, and I suppose  
3 then what? Can you do that?

4 MR. MACDONALD: And then we showed you an  
5 example --

6 THE COURT: No. Is that the issue? Can you  
7 do that?

8 MR. MACDONALD: No, you can't.

9 MR. CHAPMAN: That's the issue.

10 THE COURT: This is the one that says, here's  
11 the methodology for receiving the rate. We're going  
12 to jump through all these hoops. We're going to have  
13 a very complicated formula. We're going to assess  
14 everything. Then we're going to set the rate based  
15 upon what money we have. That one?

16 MR. O'CONNELL: That one, yes.

17 THE COURT: There's no claim that that was  
18 not properly noticed, right?

19 MR. O'CONNELL: Yes, there is that claim.

20 THE COURT: Oh, there is?

21 MR. MACDONALD: That was the -- we're talking  
22 about the inpatient rate?

23 THE COURT: Right.

24 MR. MACDONALD: That was the rate reduction  
25 that took place when the Governor signed the executive

1 order and marched over to the legislative office  
2 building and presented it at 9:00 a.m. the same day,  
3 and there was no notice whatsoever, and I think Ms.  
4 Dunn testified to that.

5 THE COURT: I got that. But didn't the state  
6 plan provide at that time that the rate would be  
7 calculated according to a methodology that included  
8 adjusting for state budget neutrality factor?

9 MR. MACDONALD: That is a legal issue. We  
10 claim --

11 THE COURT: But that's a yes?

12 MR. MACDONALD: Yes.

13 THE COURT: Okay. So then doesn't the issue  
14 really arise as, did they comply with the state plan?

15 What if the state plan properly interpreted  
16 says, here's our method, our method is whatever money  
17 we have we're going to adjust the rates in order to  
18 achieve that goal of spending no more than that? Can  
19 you have a plan that says that?

20 MR. MACDONALD: I don't believe so, your  
21 Honor. I don't think that's considered --

22 THE COURT: Because that's far different from  
23 a 13(A) claim of I didn't get notice. That's more a  
24 30(a) claim of you're not doing it right.

25 MR. MACDONALD: Your confusion -- or the

1 confusion around --

2 THE COURT: Yeah, it's confusion. It's  
3 confusion.

4 MR. MACDONALD: There are really two notice  
5 requirements here. One is 13(A).

6 THE COURT: Uh-huh.

7 MR. MACDONALD: And that deals with rates.  
8 And they need to be published and the justifications  
9 need to be articulated.

10 The second is, when you change the state plan  
11 that's subject to a notice as well.

12 THE COURT: Uh-huh.

13 MR. MACDONALD: And so on this particular  
14 example the plaintiffs contend that 13(A) could never  
15 have been satisfied because the manner in which the  
16 rate reduction was effected. In other words, the  
17 Governor signing the executive order, going over to  
18 joint fiscal, and getting it approved within minutes.  
19 Never noticed. It just happened. That's the  
20 violation of 13(A).

21 THE COURT: Why is it if that is what the  
22 plan says the proper methodology consists of?

23 MR. MACDONALD: Because --

24 THE COURT: Say the plan said the methodology  
25 we're going to use is this. There's going to come a

1 time when the Governor is going to determine how much  
2 money to recommend the legislature appropriate, and  
3 there's going to come a time the legislature is going  
4 to appropriate that amount. And whatever that amount  
5 allows the rate to be, that's going to be the rate.

6 MR. MACDONALD: Well, I still think the state  
7 has an obligation to publish the rates and whatever  
8 their justifications are. That's what 13(A) says.  
9 That's what 13(A) says.

10 Now, if I may while we're on this rate  
11 reduction, I just want you to understand -- the Court  
12 to understand that we also contend that the state plan  
13 does not support an across the board rate reduction as  
14 it's written. And our evidence there was pointing to  
15 a prior instance where they had to achieve an across  
16 the board rate reduction and they sought a state plan  
17 amendment to do so.

18 THE COURT: Oh, sure. Right, right. You've  
19 offered that just as sort of an example of how it's  
20 supposed to be done and an admission that they  
21 understood that.

22 MR. MACDONALD: Exactly.

23 THE COURT: All right. Okay. Any questions  
24 for me? Are we all set? 9:00 o'clock Friday?

25 MS. SMITH: 9:00 o'clock.

1           THE COURT: Let's try to do it in a half day  
2 if we can. Do you really have a lot? What are your  
3 witnesses going to be?

4           MS. SMITH: We haven't finished Ms. Dunn yet,  
5 who was the last of their witnesses.

6           THE COURT: Right.

7           MS. SMITH: We also had just discussed that  
8 we will confer tomorrow morning about who else they  
9 plan on calling. They have several other witnesses of  
10 ours that are on their list. If they don't call  
11 those, we will then decide which of our witnesses we  
12 still have to call after Ms. Dunn. But we did have  
13 the finance director, Marilee Nihan, as well as a  
14 couple other witnesses on our list.

15          MR. MACDONALD: Your Honor, we're very  
16 mindful of the principles of the timely efficiency,  
17 quality of life, and we'll work together to streamline  
18 things.

19          THE COURT: If you can -- I don't want to put  
20 too much more of a burden on you, but I think it will  
21 be time well spent -- what I just outlined by way of a  
22 chart would be really helpful. You don't have to do a  
23 rendition of all of the -- you know, starting with the  
24 Magna Carta and everything, but a chart would be very  
25 helpful.

1           MR. MACDONALD: I actually have a little  
2 cheat sheet right here.

3           THE COURT: Yeah, a chart would be very  
4 helpful as to exactly what your claims are with  
5 respect to 13(A) particularly and 30(a) somewhat.

6           MR. O'CONNELL: Would you like that  
7 conventionally filed, or do you want it through ECF?

8           THE COURT: Oh, either one.

9           MR. O'CONNELL: Just bring it to court?

10          THE COURT: Sure. I assume you're on the  
11 same page as to who is claiming what and what they're  
12 claiming?

13          MS. SMITH: They have some things on their  
14 charts we don't think are in their claim. As long as  
15 they don't put that on their chart, we may be on the  
16 same page.

17          THE COURT: Well, maybe you could do the same  
18 thing then. Again, just a chart. Not a big memo or  
19 anything. Just a chart saying, you know, this is  
20 their 13(A) claim with respect to inpatient rate  
21 reduction. This is why -- this is our notice. This  
22 is where we published. This is what we published.  
23 It's what it says. Done.

24          MS. SMITH: We've already discussed working  
25 on that tomorrow.

1           THE COURT: Great. Thank you very much. I  
2 appreciate it.

3           MR. O'CONNELL: Thank you, your Honor.

4           THE COURT: Have a good day.

5           (Conclusion of hearing at 4:55 p.m.)
